Important Names & Addresses

In the United States

University of Minnesota Learning Abroad Center
230 Heller Hall
271 19th Ave. S.
Minneapolis, MN 55455-0430
Phone: 612.626.9000
Fax: 612.626.8009
Toll Free: 888.700.UOFM
Email: UMabroad@umn.edu
Website: UMabroad.umn.edu

Contact Prior to Departure
Erica Qualheim, Enrollment Specialist
Phone: 612.301.6807
Email: qual0080@umn.edu

Vanessa Walton, Associate Program Director
Phone: 612.626.7561
Email: vwalton@umn.edu

Heidi Soneson, Program Director
Phone: 612.625.2571
Email: sones001@umn.edu

Emergencies

In case of emergency, you or your friends and family members should contact the Learning Abroad Center at 612.626.9000 at any time. If it is after business hours, there will be a recording giving you a number to call. The Learning Abroad Center has someone on call to deal with emergencies and can contact the on-site administrators if needed. Once overseas, you should contact MSID Senegal staff in case of an emergency.

In Senegal

MSID Office
West African Research Center
BP 5456 Fann Residence
Program Emergency Phone: 221.77.610.75.55
Fax: 33.824.20.58

Mail can be sent to you in your name at the address above.

Note: Please direct all pre-departure questions to the Learning Abroad Center, not to the on-site staff.

Telephone Codes

To call the Senegal from the US, follow these dialing directions:

1. First dial 011, the US exit code.
2. Next dial 221, the country code for Senegal.
3. Then dial the phone number.

Time Differences

Senegal is 6 hours ahead of Minnesota (Central Time). Note that due to daylight saving time, the time difference is 5 hours during certain points of the year.

Program Health & Safety

Program health and safety information is available at http://global.umn.edu/gosafe/index.html.

Introduction

Purpose of This Handbook

Before you leave the country, make sure that you have read and understood the information in your Confirmation Checklist, the Health & Safety Online Orientation (available in your confirmation checklist), and the information outlined in this handbook. These materials will guide you on a safe and successful learning abroad experience.

Valuable resources for your friends and family members can be found at UMabroad.umn.edu/parents. It discusses topics such as health and safety, program prices, logistics, and travel.

Overview of the Program

The information below can help ensure that your learning goals match MSID’s program philosophy. Consider these statements and reflect on your own goals for the program.

Introduction to MSID

Mission

Minnesota Studies in International Development (MSID) is devoted to the preparation of culturally sensitive individuals who are committed to the concepts of justice and sustainable development for all societies in our interdependent world. MSID seeks to engage students, faculty, and staff, as well as the general community, in dialogue and reciprocal learning with people from Africa, Asia, and Latin America concerning local and global problems, with a particular emphasis on development issues. Through grassroots internships and research experiences in development projects, MSID participants gain first-hand experience with the conditions, needs, and strengths of the countries involved with the program.

Philosophy

Founded in 1981, MSID is an interdisciplinary, academically, and personally challenging study abroad program, combining classroom learning with practical experience. At its core is a grassroots internship or research project with an agency striving to contribute to development or social justice. Participants often report this placement to be one of the most life-changing experiences they have had.

Learning Outcomes

- Foster an understanding of the global context through classroom and experiential learning
- Cultivate awareness and appreciation for development issues through engagement with diverse communities
- Translate insights gained into thoughtful and respectful long-term perspectives on concepts of social justice and sustainable development
- Strengthen communication skills through acquisition of local languages and cultural awareness
- Gain cross-cultural competencies through extended engagement at a local grassroots organization

Cultural Experience

MSID seeks to maximize cultural immersion through:

- Internships
- Research projects
- Housing with host families, usually one family during the classroom phase and a second during the internship phase (Some students with urban internships may have the same family throughout their in-country MSID experience.)
- Written assignments help students bring their experiences back into the classroom and to relate them to course themes and concepts.

MSID focuses on issues of development.

MSID participants should be keenly interested in learning about these themes. This is not to say that you must have lots of relevant background—MSID does not require students to have studied development or engaged in service learning—but the content of the curriculum should mesh with your learning goals. Most participants also want to “experience Kenya,” “learn about Indian culture,” or “improve my French in Senegal.” You will indeed learn a great deal about your host culture and language.

MSID will give you many questions but few answers.

Poverty and complex social issues are challenging realities to tackle. None of the world’s development models seem to be working well—at least if our definition of development incorporates sustainability and equity. You will be looking at development and social issues as they present themselves in the “real world” and not just in textbooks.

MSID emphasizes grassroots.

MSID internships will immerse you in the everyday realities of the country where you are studying. Your experiences will give you insights into the conditions of life for the great majority of the population that is poor. This means that MSID seeks to arrange placements in rural areas or relatively poor urban neighborhoods and, as a result, your living and working conditions may be rather basic.

MSID is experiential and academic, flexible and highly structured.

MSID requires a balanced learning style and is for students who want to learn from field experience, but it also involves reading, writing, schedules, and deadlines. It requires a strong commitment to your host family, your agency, your community, and your faculty.

MSID calls for cultural sensitivity.

Respect for other cultures is a must in any study abroad program and especially in an immersion program like MSID.
You will live with a local family, work in a local agency, receive instruction from local faculty, and depend on support from local administrative staff. You will need to adapt to the host culture rather than expect it to adjust to you.

**MSID presents special challenges to women.**

For some students, the feelings engendered by being female in what may seem an anti-feminist society have proved painful and distracting. While striving to remain culturally sensitive, women have experienced incidents of harassment, seeming over protectiveness by host families (with respect to hours kept, places frequented, friends chosen), and a general feeling of being watched and even judged in public. Roles are defined by gender in many cultures, and you may elicit negative responses if you do not follow the prescribed role; moreover, foreign females may sometimes experience harassment even if they do follow the rules. When in country, be prepared to find your values and understanding of the world challenged daily.

**MSID will change you.**

Students repeatedly return from this program talking about how it has transformed their lives. You will learn astonishing things about yourself, acquire invaluable skills, and return to the US asking searching questions about your own society and your own values.

---

**Preparation & Planning**

**Documents**

**Passport**

A valid passport is required to enter Senegal. If you don’t have a passport, you should apply for one right away. Passports can take 4–6 weeks to process, so it’s important to begin this process early. More information is available at [UMabroad.umn.edu/students/travel/passports](http://UMabroad.umn.edu/students/travel/passports).

**Embassy Contact Information**

Always keep your passport in a safe place. If your passport is lost or stolen, contact the local police, the American Consulate or Embassy, and the on-site staff. To identify the consulate or embassy nearest you, consult [http://usembassy.gov](http://usembassy.gov).

**Visa/Immigration Documents**

Visa regulations for Senegal can and do change frequently. Details on the current visa process can be found on the program website: [UMabroad.umn.edu/programs/africa/msid-senegal/apply/visa](http://UMabroad.umn.edu/programs/africa/msid-senegal/apply/visa).

**Non-US Passport Holders**

Students who are not traveling under a US passport may have to follow different visa procedures in order to enter Senegal. Details on the current visa process can be found on the program website: [UMabroad.umn.edu/programs/africa/msid-senegal/apply/visa](http://UMabroad.umn.edu/programs/africa/msid-senegal/apply/visa).

**Power of Attorney**

We encourage you to consider designating someone as your Power of Attorney while you are abroad. Your Power of Attorney can act as your legal representative in a number of situations, including banking and tax issues. For more information, review the information at [UMabroad.umn.edu/students/policies/finances/powerofattorney](http://UMabroad.umn.edu/students/policies/finances/powerofattorney).

**Safekeeping Important Documents**

Copy all of your important documents and store the copies separately from the originals. Leave an additional copy with someone in the US and keep an electronic copy in a secure location.

Once in country, your local MSID staff will give you advice about keeping your passport and visa secure.

Your passport and visa are valuable documents. Do not lose them. You cannot leave Senegal without them. The process of replacing a passport is much easier if you have a copy of it. If your passport is lost or stolen, you should notify your local MSID staff, the local police, and the US Consulate.

**Coordinated Group Flight**

**Purpose & Benefits of Village Travel**

The LAC arranges an optional coordinated flight in consultation with Village Travel, a local travel agency. This flight confirms the official arrival date and time. The program staff will meet this flight at the airport. Village Travel will contact you directly when this information is available.

Information, booking, and payment are handled directly by Village Travel. Consult Village Travel’s website for information on the coordinated flight: [http://villageinc.com](http://villageinc.com).
The coordinated flight cost is designed to be competitive, but priority is placed on services such as routing, ticketing flexibility, and the ability to make group reservations and reserve specific travel dates. Travel can be arranged from any location in the US or internationally and every attempt will be made to connect with the coordinated flight. While you are not required to choose this group flight, it is designed to offer travel in the comfort of other participants in the program.

If you make your own flight arrangements, select a round-trip flight that has a flexible return date, since most students change their return date. Flying standby is not allowed.

If you are not taking the coordinated flight, you are required to provide the LAC with a copy of your flight and train (if applicable) information by the date requested. If you elect not to take the coordinated flight, you must arrive **within six hours prior** to the coordinated flight. Always bring a copy of your itinerary and your electronic ticket number (NOT your confirmation number) with you. Some airlines and ticketing agents outside of the US will require you to show this at the airport check in.

**Arriving Early**
Consult the coordinated flight section in this handbook for general information regarding arrival. Students traveling to Senegal may not arrive prior to the official arrival date without permission from the LAC. Students arriving early will be required to stay at the orientation hotel, which will cost approximately $50 per night, for safety reasons. The on-site staff will transport students from the airport to the arrival hotel. Students who are approved to arrive in country prior to the official start date will be responsible for their own housing, food, and transportation until the official start date of the program. Students are also responsible for making sure they are compliant with immigration requirements associated with an early arrival.

**Staying After the Program**
If you intend to stay in Senegal after the program ends, you are responsible for your own housing and your transportation to the airport when you depart. It is not acceptable to remain in your homestay after the program, unless the on-site staff authorizes it. In all cases, you must pay for any lodging after the program ends. For students departing on the official coordinated flight on the program end date, the on-site staff will arrange transportation to the airport for you.

**Round-Trip Airline Tickets**
Round-trip tickets are the best option, since many countries require travelers to purchase a round-trip ticket as part of the visa process. In addition, one-way tickets can be expensive, and it is extremely difficult to find a return flight to the US.

**Packing**
Packing is highly individual, and no single list will work for everyone. A packing list is provided at the end of this guide. The following considerations can help you pack wisely.

**Packing Principles**
Think about laundry. Lighter colors help you stay cool, but darker colors show dirt less; you might wish to strike a happy medium if you expect to be in hot areas. Stress lightweight fabrics that can be easily handwashed, can hold up to repeated washing, and do not need ironing.

Plan to be presentable. People dress nicely every day in Senegal, especially in the cities. Pack clothing that is relatively new, both to be sure it lasts through your time overseas and because you will feel uncomfortably out of place if you wear ripped, baggy, or faded clothes.

Be conservative. Some clothing that is common on a US campus could attract unwanted attention in Senegal. If you wish to pack a running outfit, choose athletic pants or shorts that extend to the knee. Do not plan on wearing shorts except when you go to the beach. If you use tank tops, choose modest ones. Women in rural areas tend to wear skirts for comfort.

Try to anticipate your internship, research project, and other activities. For example, if you think you will work partly in an office setting, you will dress more formally than if you want to work in a village. If you expect to work outdoors a lot, include boots and rugged clothing.

Choose your luggage wisely. Most students prefer backpacks to suitcases. Buy a high quality backpack/daypack. Can your smaller backpack/suitcase nest inside a larger one? Will your carry-on double for weekend travel?

Anticipate possible delays (or even losses) in checked baggage when packing your carry-on. Pack in your carry-on anything that you would need during your first two or three days in country, including prescription drugs, as well as small items that are fragile, irreplaceable, or of significant monetary value. Do not take scissors, knives, etc., in your carry-on.

Remember you can buy things in country. You can purchase clothing and other items in country, although you will not have time to devote to shopping for new items, especially when you are at your internship site. If you have a strong brand preference, ask a returnee whether your brand is available in your country. Very tall students might find it hard to purchase clothes of the right size.

You will find many clothing items to be cheaper in Senegal than in the US. However, other products, such as batteries, personal hygiene, feminine products, etc. are often more expensive in Senegal and not always readily available.
Don’t take the kitchen sink. The most consistent feedback from returned students is “I packed too much!” Be selective. No one will need all the things on the packing checklist in the Appendix. Decide what, and how much, is really essential to you. Try to get by with one large backpack and a carry-on. Many savvy travelers recommend that you pack once, try walking around the block with all your stuff, and then begin eliminating things until you can do it comfortably.

Laundry
In most cases, your family will do your laundry. Since dryers are infrequent, have sufficient undergarments for the delay in receiving your items back. Keep in mind that you should rinse and clean any underwear that is soiled, since this is considered a very private matter.

A Note on Electricity
The supply of electricity tends to be erratic in Senegal, with frequent blackouts and occasional power surges. You will need a good surge protector if you are taking a laptop computer or any other sensitive items, and if you are using a computer you should save documents frequently.

European-style plugs will work in Senegalese outlets.

Electricity is very expensive, so host families may want you to limit your use of electronic appliances in the home.

Important Policies
Policies of the University of Minnesota and the Learning Abroad Center exist primarily for the protection and safety of LAC study abroad participants. The LAC expects all participants to read, understand, and adhere to the University of Minnesota and LAC policies, guidelines, and contractual documents. These include academic policies, finance and cancellation policies, health and safety policies, and student rights and responsibilities: UMabroad.umn.edu/students/policies.

FERPA
Under Federal Family Education Rights and Privacy Act of 1974 (FERPA), Minnesota Government Data Practices Act, and University policy, college students are considered responsible adults and are allowed to determine who will receive information about them. As a result, the LAC does not share academic, personal, or financial information with a third party (including parents, spouse, guardians, etc.) without the student’s written permission. As part of their application, all students designate two emergency contacts who will receive information only in the case of an emergency.

Official Communications
Your UofM email address is the official means of communication. LAC messages will be sent to your UofM email address.

Health & Safety

Health

Health Information Form
The purpose of the form is to help the University of Minnesota Learning Abroad Center (LAC) to assist you in preparing for your time abroad. It is critical to disclose fully any health conditions or accommodation needs you may have on the LAC’s Health Information Form. If your condition changes after completing this form or you realize you forgot to fully disclose anything, contact the LAC and provide the updated information as soon as possible.

Timely disclosure allows the LAC to support your overseas experience effectively. The information provided will remain confidential and will be shared with program staff, faculty, or appropriate professionals only as pertinent to your own well-being.

For more information, visit: UMabroad.umn.edu/students/healthsafety/healthinfo.

Mandatory Health & Safety Online Orientation
The mandatory Learning Abroad Center Health & Safety Online Orientation contains important information on health precautions, taking prescriptions overseas, and the mandatory insurance policy in which you will be enrolled as a program participant. Refer to your online acceptance checklist for the link to this orientation information and contact the LAC with questions.

Health Insurance

US Health Insurance
All students enrolled at the University of Minnesota are required to have US health insurance. This includes students registered for education abroad.

The travel, health, and security insurance coverage through CISI is specifically exempt from the requirements of the Affordable Care Act (ACA) and was not intended to and does not satisfy a person’s obligation to secure minimum essential coverage beginning in 2014 under the ACA. The University encourages travelers to consult with their legal counsel or tax adviser for information on their obligations under the ACA.

For more details and specific process information for students with University of Minnesota Student Health Insurance through the Student Health Benefits Office, visit the LAC’s US insurance webpage: UMabroad.umn.edu/students/healthsafety/intlhealthinsurance/ushealthinsurancerequirement.
CISI Insurance

In addition to your US health insurance, the University of Minnesota has contracted with Cultural Insurance Services International (CISI) to provide comprehensive international travel, health, and security insurance. This coverage is mandatory for all students and included in the program fee. You are covered by CISI only for the dates of the program and a few days to allow for travel to and from the US. If you plan to travel before or after your program, you should extend your CISI coverage or purchase your own insurance.

CISI does not include any preventive care, and individuals are advised to consult their medical providers for any checkups or preventive care prior to departure. Your CISI card and insurance policy will be emailed directly to you. Carry the card with you at all times. If you have any questions or need additional information about CISI, visit the LAC’s insurance webpage: UMabroad.umn.edu/students/healthsafety/intltheathinsurance.

Medication Overseas

Prescriptions

Bring all necessary medication (including such items as birth control), for the entire term of your program, with you to your study abroad site. It is often illegal to ship medication overseas, and even when shipping medication is allowed it is not reliable and could result in high import taxes.

Consult with your LAC program contact if you have not already discussed your medical needs, including prescription and non-prescription medications. Some medications, including those that are commonly available over the counter in the US, are controlled or banned substances abroad. The LAC, in consultation with CISI, will assist you in determining if you can travel with your medications or if alternative solutions must be explored.

Vaccinations, Immunizations, & Travel Medicine

The LAC recommends that all students visit a travel clinic before their program abroad. Make an appointment as soon as possible so that you can get a scheduled appointment in time to complete any required and recommended immunization series. Many travel clinics often book far in advance (especially around the holidays), and some immunizations need to be started months in advance of your departure. For more information, visit: UMabroad.umn.edu/students/healthsafety/preplanning.

Review the Centers for Disease Control and Prevention (http://cdc.gov/travel) and US Department of State (http://travel.state.gov) websites for general vaccination, immunization, and other travel medical information for the countries you will visit. It is strongly recommended by the CDC that all travelers are up-to-date on routine vaccines before travel. These include measles-mumps-rubella (MMR), diphtheria-tetanus-pertussis, varicella, polio, and your yearly flu shot. However, only a travel clinic will be able to make a recommendation tailored for your specific travel plans and health history.

Medical facilities and health conditions in Senegal are significantly less advanced than in the US. It is important that you inform yourself prior to departure what precautions to take while living in Senegal. Long before travel, consult with a health provider specializing in travel medicine; most general practitioners lack the requisite knowledge. Following consultation with a travel health specialist, you will need a number of immunizations. Ensure that these are recorded in your international immunization record, a yellow card that you should keep with your passport.

Dakar has good doctors and medical facilities, and care may be quite satisfactory in some other major cities as well. Only rudimentary levels of care, at best, tend to be available in villages and small towns.

A Few Additional Tips

• Avoid eating in restaurants with poor hygiene or buying food from street vendors. Assure yourself that food is well cooked. Avoid uncooked fruits or vegetables unless you can peel them yourself.
• Wash your hands frequently.
• Tap water is not recommended. Drink boiled or bottled water (either carbonated or non-carbonated). Soft drinks are usually okay, but beware of juices that may be diluted with water.
• Ice is as unsafe as water. Never add it to drinks unless it has been made from boiled or bottled water.
• Take your own medications with you.
• If you travel to high altitudes, avoid intense exercise until you have adapted. Drink lots of liquids and eat lots of carbohydrates. Monitor any symptoms of altitude sickness, which can include headaches and nausea.
• It is strongly recommended you bring a water purification filter.

Malaria & Dengue Prevention

Consult with your travel clinic regarding malaria and dengue risks and prevention.

Your travel health clinic will most likely recommend that you take a prophylactic (preventive) drug for malaria. It is essential that you purchase and take the medication as recommended by your healthcare provider. Depending on your insurance coverage, malaria medication may be very expensive but it is well worth its benefits. If you get malaria, you will become very ill very quickly, may need hospitalization, and may suffer lifelong consequences.
Students in the past have inquired about purchasing malaria preventive medication in their study abroad country. The LAC strongly advises against this approach for two reasons. First, in order to be protected, you must take the medication prior to your departure. Second, exposure to malaria-carrying mosquitoes could occur as soon as you arrive in country. While the medication cannot prevent you from contracting malaria, it significantly reduces the symptoms, allows you time to seek medical attention at a clinic in country, and facilitates a more speedy recovery.

Speak with your US travel clinic about possible side effects and alternative anti-malarials if a change needs to be made overseas. Not all overseas physicians are aware of the different types of medications available, so inform yourself before you leave. Should you experience side effects once overseas, speak with the on-site staff and your US travel clinic about next steps.

Your travel clinic will also likely suggest that you purchase insect repellent with at least 21% DEET to help ward against malaria-carrying mosquitoes as well as those carrying other illnesses. Ultrathon, manufactured by 3M, contains 30% DEET and has been recommended by health professionals.

You should use insect repellent during the day and especially at dusk and in the evenings. Mosquitoes carrying dengue fever are active in the day, and malaria-carrying mosquitoes are active at night.

There is currently no vaccine or medicine to prevent dengue. Travelers can protect themselves by preventing mosquito bites.

Rabies Vaccination
Consult with your travel clinic regarding rabies vaccination. The rabies vaccine is often recommended for travelers who may come into contact with wild or domestic animals. Keep in mind that it is not possible to initiate the vaccinations in the US and then complete them overseas. Dosage and type of vaccinations differ from country to country. For more information, visit: http://www.cdc.gov/travel/diseases/rabies.

Yellow Fever
Travelers to certain parts of South America and Africa are at risk for yellow fever. Some countries require all travelers to show proof of yellow fever vaccination before they can enter the country. Other countries require proof of vaccination only if travelers have been in a risk area, so if you are visiting multiple countries, the order of travel may be important.

Proof of vaccination is not valid until 10 days after you get the vaccine, so plan to get the vaccine early if you need it. Not all travel clinics carry the yellow fever vaccination, so search for a yellow fever travel clinic at http://www.cdc.gov/travel/yellow-fever-vaccination-clinics/search.

Safety

Travel & Safety Considerations

State Department Travel website
Consult the United States State Department Country Information sheets, travel advisories and travel warnings at http://travel.state.gov for up-to-date information on travel precautions for the country where you will be studying or traveling.

CDC Information
Review the Centers for Disease Control and Prevention (http://cdc.gov/travel) and US Department of State (http://travel.state.gov) websites for travel and safety information.

Embassy STEP Registration
The LAC will register you with the Smart Traveler Enrollment Program (STEP), which makes your presence in Senegal known to the US Department of State. Once you are enrolled in this program, you will receive the travel updates and information directly as they are issued. Please carefully review these messages and contact the LAC or on-site staff with questions. For more information, visit: https://step.state.gov/step.

In addition, the local embassy can be a source of assistance and information in the case of an emergency. Each of our programs has information about the local embassy, and you might even have an embassy visitor at your orientation. For more information, visit the Country Information sheet at http://travel.state.gov for the countries you will visit and study in.

In order to ensure that all official communication from the US Department of State is sent to the correct address while you are abroad, check your official contact information prior to departure. Visit http://onestop.umn.edu to verify that the information is correct. If your contact information changes, you must notify the LAC.

Sexual Harassment & Sexual Assault
The University of Minnesota and Learning Abroad Center take the risk of sexual harassment and assault very seriously. This topic will be covered in orientations in more depth, and LAC staff and our colleagues on site are trained and prepared to provide support to victim survivors.
Anyone who experiences sexual harassment or sexual assault while abroad must deal with the stress of this unwanted event in a place and culture that is unfamiliar. Being away from the support and comfort of home can exacerbate feelings of hurt, confusion, anger, and loss of control. This is normal.

Do not tolerate behavior that feels threatening or disrespectful by staff in country, faculty members, or homestay family members. When in any doubt, consult with someone with whom you feel comfortable.

Report any incidents of sexual harassment or sexual assault to in-country or LAC staff so that we can help you understand your options and supports available. The Aurora Center is a fully confidential resource for all students on LAC programs, even if you don’t normally attend the University of Minnesota.

For more information on resources, including the Aurora Center, visit: http://global.umn.edu/travel/assault/index.html.

The University of Minnesota prohibits sexual harassment and retaliation. In compliance with Title IX, the LAC will work with the University’s Title IX coordinator on any related inquiries and complaints. For more information, please contact the LAC or visit https://diversity.umn.edu/eoaa/titleix.

Alcohol & Drug Use
The University of Minnesota Code of Conduct and Code of Conduct for Education Abroad allow for responsible drinking if you are legally allowed to drink in your host country. Illegal, irresponsible drinking and/or misbehaving while drinking are violations of the University’s policy.

The University of Minnesota has a no-tolerance approach to drug use while abroad. Students using drugs abroad may immediately be removed from the program at their own cost. You are subject to the laws of the host country while abroad, and penalties for foreigners using or possessing drugs abroad are often very strict.

For more information, visit: UMabroad.umn.edu/students/healthsafety/alcoholdrugs.

Personal Safety
When you are traveling overseas, there are a number of precautions you should follow in order to travel safely. Consult the US State Department’s resources and your orientation materials for up-to-date information on travel precautions for the country where you will be studying or traveling.

For more information on women travelers: https://travel.state.gov/content/passports/english/go/Women.html

For more information on students abroad: http://travel.state.gov/content/studentsabroad/en.html

For more information on staying safe while abroad: UMabroad.umn.edu/students/healthsafety/safetyabroad.

Emergency Procedures
All students are required to carry a cell phone for use in an emergency. On-site staff will contact you on your cell phone, and you will utilize your phone to contact on-site staff and/or emergency services. In a life-threatening emergency, please seek immediate emergency care; otherwise, please contact on-site staff for assistance and recommendations. On-site staff are trained and have resources available to respond to all types of emergencies including, but not limited to, civil disturbance, natural disaster, illness or injury, hospitalization, robbery or pickpocketing, sexual assault/harassment, hate crimes, and mental health.

The LAC will utilize on-site resources as well as insurance and security resources, including CISI. See more details above on insurance.

For more information, visit: UMabroad.umn.edu/students/healthsafety/emergency.

Independent Travel

Independent Travel Notification
You are encouraged to travel during official program break periods, over holidays, or after the program is completed. During the program, travel on the weekends should be limited to nearby locations to ensure that you are able to maintain good rest, health, and timely completion of all coursework. Students are not permitted to travel during the program dates, including on weekends or vacations, to countries currently under a US State Department Travel Warning. See http://travel.state.gov for the most up-to-date list.

Consult with the on-site staff, well in advance of your planned travel, to understand if there are other locations, beyond the Travel Warning locations, that you are not permitted to visit within your host country or region. These limitations are put in place for your safety and security and apply within the program dates. If you choose to visit a Travel Warning or other banned location before or after your program, you do so at your own risk.

All LAC program participants must notify the on-site staff of any independent travel that leaves the program location overnight. The required independent travel form is provided in the appendix of this handbook. Some sites will collect this form and others will have a slightly different way of collecting the same information, so refer to your on-site orientation for more specifics.

Travel Restrictions

During the Program
Students are not allowed to visit any country currently under a US Department of State Travel warning as a part
of personal travel. Please visit http://travel.state.gov/content/passports/english/alertswarnings.html for up-to-date information about travel warning countries. If you have questions about travel restrictions, contact the LAC.

Due to the political situation in the south, students are restricted from traveling to the Casamance region.

Driving & Renting Vehicles Abroad

It is against University and Learning Abroad Center policy to drive or rent motor vehicles (including motor scooters or motorcycles) while a participant on an LAC program. These limitations extend from the start date to the end date of your program and are put in place for your safety and security. Traffic accidents are the leading cause of injury and death of students abroad.

Arrival Logistics

Arriving at the Program Site

The airport in Dakar has a central entrance area where all arrivals occur. Look for the signs in French indicating “international passports/visitors” which is the line you need to use. Occasionally, you may find that they have everyone form just one line, if there is only one flight arriving. You will need to give the immigration official a local address where you will be staying. If you have your host family address, you can provide that. Otherwise, you can provide the following address for the West African Research Center: Rue E X Leon Gontran Damas, Dakar.

After immigration, you will pick up your bags from the baggage carousel and exit the customs area. Since you will not have any local currency, you should refuse any assistance from the porters. You will be asked to put all your bags on an x-ray machine to be examined again as you exit the arrival area.

Once you are outside the airport, look for the MSID sign held by our staff person. If you do not see it or if your flight arrives early, wait just inside the entrance to the airport, which is next to the exit for arrivals. Do not accept assistance from anyone unless they provide you with proof that they are MSID staff (they will have the MSID sign). If an MSID staff person does not arrive within 30 minutes of your departure from the airport, have one student go into the airport or enter the exit area for arrival and find an official airline agent to help you call Dr. Sene. If you have a cell phone with international dialing ability, you can also call Dr. Sene yourself. Do not accept cell phone use (une portable) offered by the taxi drivers or others. They will expect payment and will continue to hassle you.

You might need to provide a local address again when you depart Senegal, and you can give your host family’s address in Dakar.

Note: If you do not arrive with the coordinated flight you must arrive within six hours prior to the coordinated flight. Students who are arriving independently of the group flight should wait until the coordinated group flight lands and the MSID staff arrives for pick-up.

Initial Arrival Housing

Students will spend their first 2–3 nights in Senegal staying at a hotel during orientation. Students will move in with their host families on the last day of orientation.

Program Information

Orientation in Country

For the initial in-country orientation, you will review topics like using public transportation, academic, homestay, health and safety, and acclimating to your new home.

Program Excursions

Although excursions change from semester to semester, you can expect to visit a variety of sites that may include local markets, development agencies, and areas of interest around Dakar. Students will also participate in 3- to 4-day excursions to Toubacouta to learn about rural community development.

In-Country Staff

There is a dedicated team in Senegal who is available to assist your daily life adjustments. MSID students rely on the staff to answer cultural questions, give travel advice, and lend a supportive ear when students are feeling homesick, among many other things. The on-site directors maintain frequent email communication with the MSID staff in Minnesota.

Ousmane Sène, Ph.D., Program Director

Dr. Sène chaired the Department of English, Université Cheikh Anta Diop, Dakar, for 10 years. He received his PhD in literature from the École Normale Supérieure de St. Cloud and the Université Paris III-Sorbonne. He has taught and done research on francophone and anglophone literature at several North American and European institutions. Among his special interests is the portrayal of African social, cultural, and development issues through literature. Dr. Sène is
currently director of the West African Research Association, the institution housing MSID in Senegal. He has been involved with MSID-Senegal since 1995.

Waly Faye, Program Coordinator
Mr. Faye assists with the internship and research placements and other aspects of MSID administration and has an academic background in development studies.

West African Research Center
The program is headquartered at the West African Research Center (WARC, or CROA in French). WARC occupies a one-story compound located a few miles from downtown in a well-to-do neighborhood not far from Cheikh Anta Diop University. It includes a seminar-style classroom, offices for the principal MSID program staff, computers, a library, and a food stand where you can purchase a simple lunch to eat under the shade of a large awning in the courtyard. Senegalese employees of nearby businesses often come here to eat as well, and it is a prime space for socializing.

WARC is maintained by the West African Research Association (WARA), a consortium of US universities with research interests in the region, and also receives support from the Senegalese government. Its primary objectives are to foster research collaboration among individuals and institutions from the US and West Africa; to support researchers with a library, computer facilities, and a computer network; to create a transnational community of universities and researchers through an annual exchange scholarship program; to collect, file, and distribute research results; and to promote interdisciplinary approaches and the consideration of gender in research on West Africa and the Diaspora.

Libraries & Study Resources
Most students report that study is difficult at the homestay, where space is often at a premium, socializing is highly valued, and there is little sense of privacy.

Several other places provide good space to study. The WARC library, normally open during regular office hours, has lots of study space and is available for MSID student use. It houses only a very small collection of materials on Africa, however. Senegalese students from the English Department of Cheikh Anta Diop University also use the WARC library.

Probably the most useful research collection in Dakar is CODESRIA, which emphasizes the social sciences; however, its open hours are limited to two afternoons per week. The MSID program fee includes a Cheikh Anta Diop University library card. Materials do not circulate, however, and study space is at a premium.

Many students live a considerable distance from any of these study facilities. You may have to budget at least half an hour in each direction for transportation time.

Housing Considerations

Housing Options
All students are housed with homestay families during the classroom period. During the internship/research portion of the program, students are typically with a host family but may also be housed at a residence building at the NGO site.

Notification of Placement
MSID typically receives basic information about your first homestay family (name and address) approximately one week prior to the program start date, and we will send the information to your University of Minnesota email account. Last-minute changes occasionally occur.

Since you may not know much about your host family(ies) prior to departure, we encourage you to bring a range of generic gifts to give as gifts. Past students have recommended coffee table books from your hometown/state, a board game, T-shirts, calendars, magnets, and sweets such as jelly beans. The in-country MSID administrative staff will outline for you and the family your respective rights and responsibilities in the homestay. The family is told that for the most part your presence should not lead them to change their customs, operating rules, or food.

Housing Concerns
If you have questions about your homestay experience, speak to the on-site staff. As in the US, it is not acceptable for you to be asked, for example, to assist with caring for a host family member on a daily basis, be exposed to drunken or rude behavior, or tolerate any sexual advances. Although it is extremely rare for a host family experience to involve any of these, speak to the on-site staff if you have any concerns. You are also encouraged to consult with the MSID staff if you are experiencing communication challenges or encountering cultural differences that are unfamiliar to you.

Homestay Families
Homestays are an integral component of the MSID learning experience. All students live and share most meals with at least one family, and many with two different families—one during the classroom phase, and a second in a different part of the country during the remainder of the program. Students with internships or research projects in the main city typically choose to remain with the same family throughout. Only in rare cases does MSID permit alternative housing arrangements (i.e. a rural setting where no adequate homestay is available and the student must stay in a school or a clinic), and living independently is not allowed.
Students take breakfast and the evening meal with their host families, and all three meals on weekends. Often distances preclude returning for the noon meal during the week. Although you generally will be expected to eat the same food as your family, MSID does ask the families to accommodate the dietary needs of students who have food allergies. Many students who are vegetarians in the US decide instead to relax their standards during their MSID experience in order to minimize the inconvenience to non-vegetarian host families.

Students report that the homestays are among the richest and most challenging dimensions of MSID. You will find that a tremendous amount of your language and cultural learning takes place while you are at home. Students constantly bring insights gained from their families into the academic program, and, similarly, the classroom learning helps provide tools for a successful homestay.

The Placement Process
MSID places students with a variety of families in terms of family size, profession, ethnic background, etc. Not only do students speak in class about the differences among their families, they also drop in on fellow MSIDers in their homes. Think of each visit as an important learning experience.

The stipend paid by the MSID program to the host families is only a token gesture of appreciation for the time and expense of hosting you. The money in no way covers the cost of hosting an MSID student nor compensates for the adjustment the family agrees to undertake in order to incorporate an MSID student into their family.

Homestay Conditions
In terms of physical living conditions, all homestays are expected to meet the following:

- The location should be relatively safe, as close as feasible to the classroom location or the student’s internship/research site, and accessible to public transportation.
- Typically, only one student is placed with each family.
- Student requests for a single room or a room shared with a family member will be accommodated.
- The home should be clean and orderly and offer adequate study space for the student.
- The home should have at least one bathroom, which should meet basic standards of sanitation.
- The family should be able to offer an adequate diet, quantitatively as well as qualitatively, with food handling that meets reasonable standards of hygiene.
- The kitchen should have at least a stove and a refrigerator.
- Adequate quantities of boiled or bottled water should always be available for the student’s use.
- Either the home should have a telephone or the student should have easy access to one at the internship/research site.
- Either a washing machine should be available for student use (with soap provided by the family) or the family should arrange for weekly washing of the student’s clothes at the family’s expense, either by the family itself or by someone contracted to wash. MSID prefers less luxury to more. Nonetheless, understand that it is usually impossible to place students with really poor families. Most poor families lack the space to take in an extra family member, and many also live in areas of the city that do not meet MSID’s standards of safety.

Tips for a Successful Homestay
The MSID in-country staff seek families eager to incorporate US students into their lives. Host families are generally warm and welcoming and will want their students to participate in social events with friends and extended family. When you are placed with a family, you will probably get more than the family itself. You will get a wide range of friends, not to mention information, coaching, advice, and endless opportunities to practice your language skills. If you and the family are both willing to throw yourselves into making the experience a rich one, you are likely to look back on your homestay as a highlight of your time in MSID.

A successful homestay requires consideration and cultural sensitivity. At times your cross-cultural skills and insights will be stretched to the limit. The in-country MSID staff will supplement this with initial support and ongoing coaching to create a smooth linkage between students and their families. Staff are always available to assist and sort out cultural adjustment problems as they arise.

In Senegal, the notion of private space and time is not as common as in the US. Spend plenty of time with your host family and do not seclude yourself in your room. This is often viewed as rude and may cause your host family to wonder if you are sick or unhappy.

You will find your homestay parents and siblings very concerned for your well-being. They will be good sources of information and advice about negotiating the transportation system, safety precautions, etc. At the same time, their concern might occasionally seem to border on over-protectiveness, especially if you are a woman. Understand that the family is not trying to control you but to fulfill its inescapable responsibilities for the welfare of its US daughter or son.

In most cases, your family will do your laundry. Since dryers are infrequent, have sufficient undergarments for the delay in receiving your items back. Keep in mind that you should rinse and clean any underwear that is soiled, since this is considered a very private matter.

Host families may not have Internet access. Be aware the cost of electricity and Internet use in homes can be very high. You may be asked by your host family to pay a fee for your Internet use, and you should consult with the on-site staff about correct cultural protocol.
When you leave the house, it is important to let the family know where you expect to be and approximately what time you plan to return. Never stay overnight elsewhere without first notifying your family.

In case of minor illnesses, your family will help you seek medical attention. In the case of more serious problems, you and your family are expected to notify the MSID administrative staff immediately in order to coordinate the best possible treatment.

Most families are conservative about relations between men and women. You are not allowed to have overnight guests of the opposite sex or to receive visitors in a closed bedroom.

Be judicious in your use of alcohol. Your host family and work colleagues will disapprove of substance abuse, and drunkenness could irreparably damage your relations with people who are important to you.

It is important not to abuse hospitality. Remember to ask the family for permission to bring friends, and be ready to cover extra expenses when inviting them.

Keep your room neat and tidy and be respectful of the common spaces in the house. Since you are a guest in the home, your bedroom should be kept in a manner that shows your respect and appreciation. In most countries, the notion of personal and private space does not exist in the same manner as in the US, and your room in your host family is not the same as having your own room in the US. Do not leave your clothes strewn on the floor or leave personal belongings around the house. Do not put your shoes on furniture, including your own bed. Unfortunately, US students are often viewed as messy and disrespectful. Do your part to correct this image. Keep in mind that personal hygiene is also very important. You are a guest in their home and should present yourself with respect and cleanliness.

If you have questions about your homestay experience, speak to the on-site staff. As in the US, it is not acceptable for you to be asked, for example, to assist with caring for a host family member on a daily basis, be exposed to drunken or rude behavior, or tolerate any sexual advances. Although it is extremely rare for a host family experience to involve any of these, speak to the on-site staff if you have any concerns.

Before you leave for Senegal, it may be difficult to imagine the depth of the bonds that can develop between you and your host families. There is a special magic to friendships that cross deep cultural boundaries, and you may find the relationship with your family to be quite unlike other relationships you have experienced.

Farewells at the airport are often tear-filled on both sides. As your life becomes filled with the US hectic pace following your return, however, it can be all too easy not to take the time to keep in touch. An occasional letter, postcard, or email from you means a great deal to a family for whom you are as unforgettable as they for you. MSID asks you to take a few moments to write from time to time. Keep in mind, however, that host families should not be expected to host you after your MSID experience or on future visits you may make to Senegal.

**Liability Insurance**

Regardless of your housing arrangement, you should consider your insurance coverage and needs. Does your renter’s or homeowner’s insurance cover your items if they are lost or stolen abroad? You may also wish to buy additional insurance in case you accidentally damage your accommodations, since any damages will be yours to pay.

For more information, visit: [http://global.umn.edu/travel/resources/insurance_other.html](http://global.umn.edu/travel/resources/insurance_other.html).

**Visitors**

**Program Housing**

Students’ personal guests (e.g. friends, family, etc.) are not allowed to stay overnight in program housing, including apartments, dorms, and homestays.

**During Program Period**

Friends or relatives may visit during official program breaks or before or after the program, but not while classes are in session or during the internship phase. Students who miss classes or days at their internship/research location due to travel will be dismissed from the program and forfeit both the program fee and all academic credit. Visits during this time interfere with your ability to focus on the program and host culture. Visitors are not allowed to stay with you in your official program housing.
Academics

Students are responsible for understanding and adhering to the academic policies for study abroad as published on the University of Minnesota Learning Abroad Center (LAC)’s website: UMabroad.umn.edu/students/policies/academic-policies.

Courses

Overview of Program Courses

August or Winter Break Session

Students can choose to participate in the August or winter break language session for an additional fee. This program grants 4 language credits and runs for three and a half weeks in August or late December to mid-January. Students live with host families and participate in excursions.

Semester Program

Courses Offered

All undergraduates take the following courses totaling 16–17 semester credits. Complete course descriptions are available on the LAC’s website.

- MSID 4001/5001, International Development: Critical Perspectives on Theory and Practice, 4 credits
- MSID 4002/5002, MSID Country Analysis, 4 credits
- SNGL 1001, Beginning Wolof, 4 credits OR SNGL 3015/3016, Advanced French, 4 credits
- MSID 4003/5003, Community Engagement in the Global South, 4 credits
- (optional) Global Identity, Connecting Your International Experience to Your Future, 1 credit

The Development course will be divided into the following tracks so that students can prepare for their upcoming internship:

- Arts & Cultural Studies
- Education & Literacy
- Entrepreneurship & Alternative Economies
- Public Health
- Social Services (poverty, homelessness, housing, youth studies)
- Sustainability & the Environment

The Social Services track may be combined with Entrepreneurship and Alternative Economies if enrollment in one or both tracks is low.

Semester Schedule

The semester program consists of the following phases:

Orientation (1 week)

In-Country Classroom Work (7 weeks)

You will spend an average of around 20 hours per week in the classroom, plus time outside doing readings and assignments. Local field trips and field assignments supplement the classroom work. You will also work with MSID staff and faculty throughout this period to define the subsequent internship or research project.

Internship/Research Project (6 weeks)

Once the classroom phase concludes, students move to their individual placements with development agencies/projects in scattered locations, some urban and some rural. Unless you are interested in a specifically urban topic, MSID urges you to consider a rural placement. You cannot really know your country if you experience only the city.

Activities. The internships/research projects are the most important hallmark distinguishing MSID from most study abroad programs. In addition to contributing to their agency/project/community, students do written assignments connected to themes and concepts from the various courses.

Support. The MSID on-site director or another member of the program faculty visits each student at the internship site once during this phase. In addition to any troubleshooting regarding the internship, these visits serve as occasions for you to hand in coursework and reflect on what you are learning.

Academic role of the internship/research project in the semester programs. In addition to academic work for the internship/research course itself, during this phase students also complete written assignments for the other courses. Each course thus becomes a different lens through which you interpret your experiences in your agency/project and your community. You might think of the internship or research project as a sort of lab section for the courses. Course descriptions are available on the LAC’s website.

Final Seminar (1 week)

The concluding week of the semester program brings students back together, whether in Dakar or in a retreat setting in the suburbs, to analyze their internships or research projects. In final sessions of the various classes, each instructor helps students tie their experiences systematically to themes and concepts from the particular course. Any final exams are also given at this time. The week concludes with an integrating seminar at which the program staff help students reflect more holistically upon their MSID experience.

Academic-Year Schedule

The academic-year program is best suited for students who are independent, self-sufficient, and seek an extended internship experience in their MSID country.
Academic-year students register for an additional 16 spring semester credits. Course descriptions are available on the LACs website.

MSID 4004, Topics: Case Studies in International Development, 4 credits
MSID 4006, Applied Field Methods, 4 credits
MSID 4007, MSID Directed Research, 4 credits
MSID 4005, Advanced International Development Internship, 4 credits

Second Semester Schedule
The calendars of the second semester vary somewhat. The following is a representative sequence.

Research Seminar (1–2 weeks)
After returning from their travel break, academic-year students work with program faculty to refine the plans they have begun to lay in the fall for their research projects. This phase includes group sessions on methodology plus individual meetings with faculty. Students also receive an additional 20 hours of language instruction, as needed.

Internship & Research I (5–6 weeks)
Academic-year students return to their sites in mid-January for their internships and their research. Each student receives a visit from the MSID on-site director or another MSID staff member sometime during the second semester. This visit is the scheduled point in the second semester for academic-year students to hand in assignments.

Spring Midterm Research Week, Seminar (1 week)
Students travel to Dakar for a week and a half. They have a week to work on their research and writing, then join the in-country directors for a midterm seminar. This is a time to compare experiences, take stock of progress on the internship and research project, plan for the home stretch, and reflect with classmates and program staff on what has been learned. It is also a second scheduled point in the semester for handing in assignments. Following the seminar, some programs have a weeklong spring break.

Internship & Research II (5 weeks)
During this period students may receive a second visit from the MSID on-site director or another MSID staff member. Again, some written assignments may be due during the visit.

Final Seminar (1 week)
The mid-semester pattern is repeated. Students again have a week in Dakar to finish any last research and writing, then join the director for a final seminar. As with the end-of-semester gathering, this seminar provides an opportunity for debriefing experiences and processing learning, as well as for evaluating the program.

Writing for MSID
MSID writing assignments can range from traditional to highly experiential, from individual to team-based. MSID requires approximately five focus papers per course and a longer end-of-term paper.

Focus Papers
Focus papers are less formal than traditional term papers, and they generally ask you to draw on both your formal coursework and your experiences as you consider an issue. A typical focus paper might be three to five pages in length. Focus papers are assigned within individual courses (their number and due dates are specified in course syllabi).

You might find it useful to think of a focus paper as a sort of take-home essay exam designed to help you structure your thinking about the relation between your in-country experiences and course themes. Topics will vary from course to course, from country to country, and from year to year.

Focus papers have two parts which faculty may combine into one paper or ask students to submit as two different papers:

Field Observation: an analytical account of something you have seen, heard, read, or experienced. Your analysis reflects on aspects of development and how it is manifested in your MSID country.

Personal Observation: a written record, grounded in experience, of your own journey. It can contain description, exploration of issues, reflection, the posing of questions, personal perspectives, and analysis of your thoughts, feelings, and observations. The focus is on the ways in which a particular aspect of development impacts you personally and your values.

The focus papers are essential vehicles for you to record the learning that is taking place throughout your MSID experience. MSID faculty have high expectations for these reports. As you write, ask yourself whether you are demonstrating not only what you have experienced but also what you have learned.

Format
Each focus paper must include at the beginning:
Your name
A title
A date
Course name
Evaluation

In evaluating the focus papers, the faculty member will assess the extent to which you have met the following general criteria:

Relevance to MSID curriculum. Is the topic related to the content of the course?

Quality of description. Does your entry include a detailed description of the particular event or topic that you plan to analyze? Have you been able to avoid interpretation disguised as description?

Quality of analysis. Does your entry reveal that you have thought in some depth about the subject? Do you develop one or more hypotheses to explain what you have written about? Do you criticize your own hypotheses?

Use of theory-experience dialogue. How well does your entry relate what you have experienced or observed to bodies of academic knowledge that have been introduced through lectures, assigned readings, etc.? Do you attempt to understand what you have observed by holding theories and concepts when relevant? And/or do you use your observations to support or challenge theories and concepts?

Evidence of growth. Do your entries show a growth in your understanding over time, whether of the host culture, of development, or of yourself? Is the quality of your description and the depth of your analysis improving?

Quality of writing. Is the entry clearly written? Well organized? Free of spelling and grammatical errors?

As you write, try to imagine someone grading your reports and deciding, partly on the basis of what you have written, that you deserve University of Minnesota credit. If that exercise makes you feel uneasy, maybe you need to thicken your description, sharpen your analysis, read more, and/or tie your experiences more systematically to formal bodies of knowledge and theory.

Language of Instruction

French is the language of instruction for this program. It is with this in mind that students are required to have completed four semesters of college-level French prior to the start of the program.

Global Identity

Global Identity: Connecting Your International Experience to Your Future

This optional, one-credit course will provide opportunities for you to “make meaning” of your learning abroad experience and prepare you to communicate your intercultural competence to future employers, graduate schools, or law schools. As global connectivity becomes increasingly important, you are asked to think beyond the borders of your own perception and better understand the world based on the new ideas and experiences to which you are exposed. Your ability to work in a multicultural setting and succeed in different cultural contexts is vital to your future. This course will help you apply these skills to your post-graduation plans.

For more information, visit: UMaBROAD.UMN.EDU/STUDENTS/ACADEMICS/GLOBALIDENTITY.

MSID Internships & Research

MSID internships and research projects are grassroots experiences with local non-profit agencies. MSID does not organize internships with banks, embassies, for-profit organizations, or large political agencies.

Internship Versus Research

Internships focus on applied learning complemented by a thematic paper that reflects on the student’s experience. Activities might include: teaching English to school children, shadowing a health professional in a clinic, assisting with a reforestation project, shadowing reports and assisting with newspaper articles for a local nonprofit news agency, organizing activities at an urban youth center.

Research projects focus on a larger theoretical topic that is relevant to development in the MSID country. Sample topics include the structure and educational goals of primary education, the realization of public health care services, organic farming and its role in the local economy, government and private funding resources for homeless children. Students who engage in a research project will typically not participate in applied, hands-on activities. The goal is to conduct research under the supervision of the host NGO agency on a larger theoretical topic.

Semester Program

For those students who enroll for a semester, the shorter internship or research period provides a meaningful opportunity to begin to understand the many aspects of the term “development.” The six-week experience entails service to the agency, and job responsibilities are usually less ambitious. The experience will also afford a powerful venue for participant observation related to MSID course themes.

Academic-Year Program

Academic-year students have the opportunity to develop a meaningful project or work assignment. These students can be of real assistance to their host agency. However, MSID cautions you not to underestimate the time it will take to get into the heart of an internship or research project, nor the number of things that can go wrong even at later stages. It is reasonable to hope to make a contribution to the agency or project, but it is important also not to judge the success or failure of your experience exclusively by how much you are able to accomplish. MSID is first and foremost an educational
program, and even internships or research projects that seem to “fail” can be powerful learning experiences. In most cases, semester and academic-year internships or research projects will be with the same agency.

**Internship or Research Placement**

As part of your acceptance process, you need to submit an Academic Information Form to the LAC. This form permits you to identify a sector in which you wish to be involved (e.g., health, environment, education), to specify, as well as you can, what sort of project you would like to have within that sector, and to indicate whether you are interested in a rural or urban placement. MSID strongly recommends that you consider a rural placement, both because it will introduce you to a very different life from that of the city where the classes are held, and because it is easier to become fully integrated into the life of rural than urban communities. Not all types of placements are feasible; for example, health-related internships or research projects in some countries cannot be in clinical settings.

MSID will forward all of the completed forms to the in-country staff, who will begin exploring potential placements even before you arrive. Upon arrival you will further discuss your placement ideas with the in-country staff. The in-country staff will make contact with one or more organizations working in the field you identified and will inquire about their interest in hosting an MSID participant. Once a tentative placement has been identified, you will have an opportunity to discuss it before it is finalized. Most requests for placement within a general field can be accommodated, but in country issues may sometimes require adjustments. Particularly if you request a project related to sensitive populations, your project may be very limited or not possible.

**Characteristics of MSID Internships/Research Projects**

- Related to development
- Grassroots, immersing the participant, directly and personally, in the social realities of the poorer strata of the population
- Designed to serve the goals of both the student and the agency
- Guided by objectives agreed to by the participant, supervisor, and in-country director
- Generally involve about 25 hours per week of work

**Placement Categories**

MSID projects fall into the following categories:

- Arts & Cultural Studies
- Education & Literacy
- Entrepreneurship & Alternative Economies
- Public Health
- Social Services (poverty, homelessness, housing, youth studies)
- Sustainability & the Environment

Visit the MSID Senegal program webpage for examples of past placements: UMabroad.umn.edu/programs/africa/msid-senegal/academics/internships.

**The Importance of Initiative & Imagination**

Past students and in-country staff have repeatedly stressed the importance of student initiative in developing successful placements. Yes, it is true that some students receive a detailed job description from their agency when they arrive at their site, but that is the exception rather than the rule. You are just as likely to be given only a general idea of what to do. If you wait for someone to tell you exactly what you need to do and when you need to do it, you will be disappointed. When you get to your site, observe, think critically, try out ideas on your host-country colleagues, and use your imagination.

**Location**

Internships and research projects in all countries are restricted to certain geographical regions. It is essential that your project be in a location that is safe and accessible. Keep in mind MSID encourages you to consider internship placements are outside of the program city in order to offer you the possibility of a comparative experience.

**Alternative Schedule**

You must discuss with your site supervisor any alteration to your schedule due to illness or travel for medical care or other necessary meetings. You or your site supervisor must also notify the MSID on-site director or coordinator if your schedule changes significantly.

**Changing an Internship or Research Project**

MSID on-site staff will do their best to help you and your site supervisor make your placement successful. Commitments are made on your behalf before you start your project, and they should be honored to the fullest extent possible. Difficulties with an internship or research project should be discussed with the site supervisor and the MSID director. Changes in placement should be a last resort. Adjustments are ultimately the decision of the resident director.

**Any participant who abandons an internship or research project without prior notification and approval of the on-site director will automatically receive a failing grade for all related coursework and may be removed from the program.**

**Extending Internships/Research Projects**

Occasionally an agency and a student would like to continue an internship or research project beyond the end of the program. Your ability to do so depends on the enrollment option you have chosen.

**Fall semester students. You may not extend your internship beyond the end of December.**
Sprin semester and academic-year students. If you complete the full program and you and the agency agree for you to stay on, you are free to do so. Typically students continue to work during such extensions on a volunteer basis. Take into account visa and health insurance issues.

Within these guidelines, any arrangement to extend an internship or research project is entirely between the student and the agency. After your particular enrollment option finishes, you are no longer an MSID student. Neither the LAC nor MSID’s in-country staff is a party to such arrangements, nor does either bear any responsibility for your welfare as you continue your work.

Guidelines for Health-Related Projects

Keep in mind the limits of your expertise. The need is great, and you must be careful to limit yourself to the areas in which you truly are knowledgeable, regardless of what people ask of you at your site.

You should decline to engage in any activity for which you are not personally trained. This includes such as activities as delivering babies, giving injections, drawing blood, and surgery. If you are asked to engage in these kinds of activities decline and seek assistance. It is much more dangerous to assist in these areas than to wait and find someone who is trained to do these activities.

You should not be asked to engage in activities that involve contact with bodily fluids, wound cleaning, or invasive procedures. Since you cannot know for certain what illnesses the patient may have, it is important to observe these activities and not participate. You can learn a great deal from observation, and you should protect your health. Be certain to take universal precautions, including using face masks, eye shields, and non-latex gloves. As these items may be in short supply in Senegal, you should bring these items with you.

HIV and HBV transmission can occur when someone is exposed through an open wound, mucous membrane, or punctured skin to infected blood or bodily fluids that are contaminated with infected blood. These bodily fluids include amniotic fluid, pericardial fluid, semen, and vaginal secretions. HIV and HBV transmission has not been documented to occur from exposure to bodily fluids such as feces, nasal secretions, sputum, sweat, tears, urine, or vomit. Saliva is only a risk factor in dental settings where saliva is likely to be contaminated with blood.

It is important to meet with a travel nurse or physician to discuss the vaccinations you will need for Senegal. If your project might involve participation in tasks or activities with exposure to blood or other bodily fluids, you should be vaccinated with hepatitis B vaccine, and you should discuss this with your health care provider.

While meeting with your travel doctor or nurse, discuss bringing along an anti-retroviral. If you decide not to take one, identify a place in the country where a reliable anti-retroviral can be purchased in the event of exposure.

MSID students in health care or HIV-related settings should use surgical gloves when handling patients if there is likely contact with bodily fluids or when handling items or surfaces soiled with blood or bodily fluids. You should bring a box of surgical gloves with you.

Wash your hands frequently and thoroughly, both the front and back of your hands and in between your fingers, with plenty of soap and water (or waterless hand cleaner) for several minutes. Particularly after exposure to any bodily fluids from another person, it is important to wash your hands thoroughly. You should also wash your hands immediately after removing surgical gloves. This not only helps protect you; it reduces the spread of illnesses from hand-to-hand contact.

You should take precautions to prevent injuries to yourself through needles, scalpels, or other sharp devices. In orphanages, you should not be asked to change diapers or clean vomit or other bodily fluids, regardless of whether the children are infected or not. Keep in mind, however, that you can be exposed to bodily fluids just in the daily contact with children. Bring along an extra set of clean clothes or at least a clean shirt to your internship site. Also keep a log of any injuries or exposures, in case medical follow-up is needed at a later time.

Designing Your Research Project

Students wishing to use their research toward their major, including as a senior project, should consult their major adviser on the home campus. See the discussion on Using Credit for Specific Purposes, in the the section on the Academic Program.

When planning a research project, keep in mind that you will be engaging in the ongoing research activities of the NGO where you will be placed. While students can often conduct additional independent research on theoretical topics that complement the agency’s activities, research involving interviews with human subjects are significantly restricted by the University of Minnesota Institutional Review Board (IRB). Contact the LAC well in advance of your MSID participation if you have questions about your research interests.

Choosing a Topic

You will determine your topic in consultation with the academic director and, in some cases, another faculty member given responsibility for overseeing the project. With this project supervisor you will develop a research plan specifying the questions to be addressed, the background reading necessary, the methodology to be employed, and the outcome to be developed.
Some students choose their topic before leaving their campus; others wait until they are in country and can ground their choice in better knowledge of local conditions. As long as you remain flexible, there are big advantages to thinking through your topic while you are still in the US; it permits you to consult with faculty on your campus and to use library and computer resources that may be difficult to match in country.

Regardless of whether you decide on a topic before or after arrival in country, you should to begin asking yourself the following questions as early as possible:

- What degree requirements do I wish to meet with my project? Does it need to fit into a particular major or minor? Does it need to meet departmental guidelines for a senior thesis? Do I understand those guidelines clearly?
- Is my topic feasible in relation to the time constraints I face?
- Am I sure I am not asking questions that are too sensitive politically or culturally? Does my host country impose any legal constraints on research?
- Do I have the necessary linguistic and/or methodological skills to carry off my project?
- Does my project require specific local resources (e.g., libraries, interpreters, or a steady supply of electricity for my computer)? If so, am I sure those resources will be available to me?
- Can my topic command the necessary faculty support?
- Can I get assistance on my campus prior to departure?

Starting Your Academic Planning

Once you have selected a topic, begin shaping the project:

- Limit your topic to something manageable. Projects that are too large are difficult to complete.
- Think through your methodology carefully, and seek advice from faculty on your campus. What do you propose to do once you are on site? What will you be looking at? With whom will you want to speak? What research tools will you use?
- Try to identify in advance the vulnerable points in your research strategy. On what local resources or circumstances are you counting? Discuss contingency plans with faculty in case those resources prove unavailable or those circumstances nonexistent.
- Budget enough time for such post-fieldwork activities as data analysis and further library research, not to mention the writing itself.

Registration

Registration through the UofM

University of Minnesota Twin Cities Students

Before registering, you should meet with your academic adviser(s) to discuss the courses you plan to take and complete the Academic Planning form. All University of Minnesota Twin Cities students will be responsible for registering themselves using the University of Minnesota online registration system. Prior to departure, you will receive an email with all the necessary information for registration. Do not look for your class number to appear on the class schedule on the MyU website. The numbers required for registration can only be obtained from the LAC. If you register for a course that is listed online, you have registered for the wrong course and may be subject to tuition charges. Complete your registration by the stated deadline in the registration instruction email from the LAC. Check online for holds or required registration approvals that would prevent you from registering for classes and clear them before the registration deadline. The LAC cannot remove holds on student accounts. Failure to complete registration may result in late registration fees and may delay or prevent financial aid disbursement. If you do not register for study abroad, your grades cannot be processed. Failure to register before departing for study abroad may result in no credit for your study abroad program.

UMN System Students

Students from the University of Minnesota–Morris, Crookston, Rochester, or Duluth will be set up as a multi-U student by their home campus. Please contact your study abroad office to verify that your multi-U status has been set up. You can then register as a UMTC student (see above).

Non-University of Minnesota Students

Students from other institutions will be registered by the Learning Abroad Center and do not need to register themselves through the MyU website.

Graduate Credit

Students participating in MSID for graduate credit take 5xxx-level counterparts to the 4xxx courses (e.g., 5801 instead of 4801), each for 3 credits. The language course does not generate graduate-level credit, although it is posted on the student’s University of Minnesota transcript. It is University of Minnesota policy that graduate students are expected to meet higher standards than undergraduates. MSID complies with this policy through two measures. First, the 5xxx-level courses are worth 3 credits versus the 4 credits for undergraduate. Second, MSID informs the in-country director which students wish to be considered at the graduate level. In-country faculty then adjust academic expectations accordingly.

Additional Resources

The University of Minnesota libraries has a dedicated page for study abroad research: http://lib.umn.edu/libdata/page.phtml?page_id=4349.
Maintaining Full-Time Status

Students are required to maintain full-time registration status as defined by their individual program throughout the duration of their study abroad program. Dropping or withdrawing from a class will not be allowed if it will bring a student below the required full-time enrollment.

Post-Program Registration

While abroad, University of Minnesota students and most other students will need to register for classes for the following term on their home campus. You must make any necessary arrangements prior to departure so that you are able to register while overseas. In many cases, students are able to register online.

Grades & Credit

All courses must be taken for A/F credit. MSID does not permit S/N (pass/fail) registration. The University of Minnesota’s A/F grading scale includes grades of A, A-, B+, B, B-, C+, C, C-, D+, D, and F.

Contact hours and credit for the International Development course, the language course, and Country Analysis course include the final seminar week and integrate reflection of the internship/research experience. As a result, students who leave the MSID program early are not eligible for partial credit for their academic work on this program.

Hours of Student Effort

University of Minnesota policy specifies that each semester credit should reflect approximately 1.25 instructional contact hours of 60 minutes and twice that amount for out-of-classroom assignments. The policy also notes that certain kinds of courses with a strong experiential component—including field seminars, internships, and research projects—may involve fewer classroom contact hours than this and greater out-of-classroom hours.

Semester programs: MSID courses conform to these standards, which means that each 4-credit course has 50 instructional contact hours, including didactic instruction during field trips. Out-of-classroom hours of student effort are achieved through reading assignments, focus paper assignments, group work, excursions, and cultural contact with host families and program-sponsored activities. Semester program internships have a minimum of 120 contact hours.

Second semester of the academic-year program: The second semester of courses for academic-year students is highly individualized. Students meet as a group during the first weeks of January and during the midterm and final seminars. The course content revolves around each student’s internship and research. Just as with internships or directed research at the University of Minnesota, contact hours during the second semester are thus far fewer. Scheduled contacts (initial research seminar, faculty visits to students at their internship sites, individual meetings with faculty during the research week, midterm and final seminars) total, on average, 50–70 hours. The remaining hours of student effort come from the research, the engagement in the internship, and their written assignments. The total contact hours at the internship site is a minimum of 240 hours with most students exceeding 280 hours.

Using Credit for Specific Purposes

Regardless of whether or not you are a University of Minnesota student, obtaining credit is one thing and getting that credit accepted toward an academic major or minor is another.

Many students wish to use one or more of their MSID courses for such purposes. Students are often able to negotiate one or more of these courses toward an appropriate major on the home campus. This will likely require documentation—one of the reasons it is so important to hold onto syllabi, graded assignments, and so on.

If you hope to apply an internship or research project toward your major or minor, it is essential that you consult with appropriate advisers and faculty before going overseas. Use the course descriptions on the LAC’s website in the discussion with your adviser or faculty. Ask your adviser for written guidelines if they exist. A faculty member in your department may wish to review the final product before deciding whether it can count toward your major or minor.

University of Minnesota students should note that MSID fulfills two Liberal Education requirements for graduation: the Global Perspectives theme and the Civic Life & Ethics theme.

Course Drop/Add

Using Credit for Specific Purposes

Regardless of whether or not you are a University of Minnesota student, obtaining credit is one thing and getting that credit accepted toward an academic major or minor is another.

Many students wish to use one or more of their MSID courses for such purposes. Students are often able to negotiate one or more of these courses toward an appropriate major on the home campus. University of Minnesota students should note that MSID fulfills two Liberal Education requirements for graduation: the Global Perspectives theme and the Civic Life & Ethics theme.

Course Drop/Add/Withdrawal

Course Changes
These must be made in consultation with the on-site staff and per the deadlines as outlined on the LAC’s Academic Policies website. Since MSID courses are all mandatory, the only change allowed is for a student to switch between pursuing an internship and pursuing a research project.

Changing Enrollment Options
During the course of fall semester, students may change their mind about the enrollment option they have chosen. MSID allows students who have chosen fall semester to lengthen their enrollment to the full academic year or academic-year students to scale back to fall only. Neither change carries an administrative fee, but keep in mind that the fall semester fee is higher than half of the academic-year fee. Students reducing to one semester will be billed this difference in cost. The Learning Abroad Center must receive notice for such a change in writing; email messages are acceptable means of notification. You must notify the LAC by December 1 for any enrollment changes.

Non-University of Minnesota students considering an enrollment change will also need to consult with their home study abroad office. Some institutions can more easily accommodate requests to extend to an academic year than others. Even if you have not made a final decision about whether to change your enrollment, please initiate the communication with your home campus early so that you will have no problems meeting MSID’s December 1 deadline.

UMN 13-Credit Policy

University of Minnesota students are required to maintain a minimum enrollment of 13 credits per semester or maintain the minimum credit enrollment determined by their study abroad program, whichever is greater. For certain semester programs, 12 credits is considered a full-time course load.

Academic Culture

Academic Rigor
The program is designed to be academically rigorous, and it is each student’s responsibility to maintain good study habits and complete assignments on time.

Students will need to learn to function simultaneously in two cultural contexts. Local time as experienced in the village or the family may be more fluid and informal than “MSID time.”

It is important to learn to flow with local time; it is equally important to retain enough structure and self-discipline in the academic part of life to avoid getting behind on assignments. Students who fail to attend class or who miss internship or research hours without prior permission from the on-site director will be dismissed from the program.

Books & Materials
All required books and materials will be provided to you once in Dakar and are included in your program fee.

Grades & Transcripts

Grades will be posted to the University of Minnesota transcript 6–8 weeks after the LAC has received them from the program. Grades will be converted into US equivalents, if necessary, prior to being posted on the University of Minnesota transcript. The LAC will provide one free transcript to the home institution of all non-University of Minnesota students. Additional transcripts can be ordered separately on the One Stop Student Services website: http://onestop.umn.edu.

Incompletes

MSID does not grant incompletes or allow students to opt out of a particular course. All coursework, including the directed research projects, must be handed in by the end of the program. Rare exceptions can be requested in cases such as serious health problems or family emergencies. These exceptions must be approved in advance by the on-site director.

Grade Appeals

If you wish to question a grade issued for a particular course after the program is completed, you must provide evidence that the professor made an error in his/her grade calculation. The following are not reasonable grounds for grade appeal:

• Differences between US and host country educational systems
• Personal disappointment in the grade outcome
• Comparison with one’s own prior academic record/GPA
• Failure to complete one or more assignments
• Minimum grade requirement of college/department or home university
• Health concerns/missed classes

Consult with your program contact in the LAC if you believe an error has occurred and you wish to complete the Grade Petition Form.
Student Grievances

Academic grievances are complaints brought by students regarding the provision of education and academic support services affecting their role as students. For grievances concerning University of Minnesota Learning Abroad Center or affiliated programs offered through the LAC, students should make inquiries and appeals to the appropriate University officials, in the following order: the program representative in the LAC, the Assistant Dean for Learning Abroad, the Student Conflict Resolution Center, and the Office of the General Counsel. For complaints concerning non-University of Minnesota programs, students should make appeals to the program sponsor.

Living in Senegal

Senegal is a relatively small country. With an area of 76,000 square miles, it is smaller than Minnesota (87,000 square miles); its population of 12.5 million, however, is twice that of Minnesota. Four West African countries cover at least five times as large a land area—Niger (489,000 square miles), Mali (479,000), Mauritania (396,000), and Nigeria (357,000)—and Burkina Faso, Ghana, and Guinea are larger as well. Within West Africa its population is less than a tenth that of Nigeria, half that of Ghana, about two thirds that of Ivory Coast, and slightly smaller than those of Burkina Faso, Mali, and Niger. Yet, its historic role as the center of Francophone West Africa gives it an importance far out of proportion to its area or population.

Senegal’s economic inequalities are representative of most African countries. The cities control most of the country’s resources, health services, educational facilities, and commercial and industrial concerns are overwhelmingly located in the urban centers. Although there are many urban poor, there are almost no rural rich. Rates of illiteracy, disease, and infant mortality are far higher in the countryside than in the cities, and life expectancy is much lower.

Senegal is poor in resources compared with many African countries. Low and unreliable rainfall combines with generally low soil fertility to limit agriculture. The country has little hydroelectric potential, and except for recent gold finds it lacks the large deposits of oil, coal, diamonds, or other major minerals found elsewhere on the continent. Senegal has the second largest reserves of marble, after Italy, but they have never been developed commercially.

The country’s most significant extractive and manufacturing industries are phosphate mining, agricultural and fish processing, and manufacture of building materials.

The combination of Senegal’s consistently pro-Western foreign policy, its capitalist economic system, and its relatively good human rights record has made it something of a darling of the international aid agencies and non-governmental organizations (NGOs), and it has attracted more foreign aid than most African countries. Most, unfortunately, has come in the form of loans. Today, nearly 40% of annual government revenues go to external debt service. Dependence on foreign aid—largely French—has replaced direct colonial domination.

Senegal’s predominant ethnic group is the Wolof, who constitute 44% of the total population. More than half the population now speaks Wolof as its first language, and over 70% as either a first or second language. Upon independence, though, Senegal chose French as its official tongue in order to avoid what could have been a politically destabilizing act of favoring one African language over another. Fewer than 15% of the country’s inhabitants, mostly among the better-educated urban sectors, speak French. Pulaar is spoken by about 26% of the population (Fulani 17%, Tukular 9%, although some would argue that these do not really constitute two distinct groups). The Diola (9%) and Mandinke (9%) both have their own languages. Other ethnic groups include the Serrer (17%, mostly Wolof-speaking), Europeans and Lebanese (1%), and other (2%).

The country’s population of 12 million is predominantly Muslim (92%); the others follow indigenous beliefs or are Christian (mostly Roman Catholic). Most people adhere to one or another of the five Muslim brotherhoods, the two most important of which are the Mouride brotherhood (headquartered in Touba, a pilgrimage destination well worth a visit) and the Tijaniyya (headquartered in Tivaouane, just outside Thiès). The brotherhoods wield considerable economic, political, and social influence. On
the whole they can be viewed as a force for stability. At the same time, they are perhaps the most powerful Senegalese institutions relatively free of government control.

Senegal’s school system is inadequate to serve the expanding population, and illiteracy remains widespread. The country has two universities. Université Cheikh Anta Diop was founded as the University of Dakar in 1957. Université Gaston Berger opened in Saint Louis in 1993. University students and graduates have become increasingly disaffected as the job market fails to expand fast enough to provide employment for them.

Senegal has been more successful at AIDS prevention than most African countries, for a variety of medical and cultural reasons, so that seropositivity rates are apparently not much higher than in US cities. Thus, Senegal does not face the crushing AIDS burden faced by countries like South Africa, Zimbabwe, and Botswana.

Language(s) of the Country

Wolof is the native language of some Senegalese, but you will find that almost everyone speaks it. Knowing the basic Wolof greetings and phrases will go a long way in getting you better service and prices.

The Senegalese people learn French in school and it is a very useful language for travellers to know. While some Senegalese merchants speak English, most business is conducted in French or Wolof. Other languages used in Senegal include Sereer, Soninke, Pulaar, Jola, and Mandinka are spoken.

Be prepared to experience tropical sun. Senegal’s rainy season is between June and September; most of the yearly precipitation falls during these months. The weather is still be quite warm if you arrive in mid-September, though the rains will be tapering off. Dakar will be quite comfortable by December, while the interior is less uncomfortable than later in the year. Nights in December and January can sometimes get chilly. The last few months of the academic-year program will be hot in the interior but still fairly cool in Dakar. Even academic-year students are unlikely to experience Senegal’s true downpours because MSID concludes just before the rainy season.

Utility Usage

Electricity and water are very precious commodities in Senegal. Be certain to shut of lights and be very thoughtful in your use of water, particularly in the homestay and at the internship site.

Relationships

Given the significant cultural differences between the United States and Senegal, MSID strongly encourages students to prioritize their academic experience and seek cultural experiences through their host family environment. What might be considered a casual drink or meal with a person of interest can have a much more significant meaning abroad, and extracting oneself from a misinterpreted encounter can
be both emotionally painful and embarrassing. It is also important to remember that it is very difficult for you to determine safely who might be genuinely interested in you and who has ulterior motives (such as stealing your passport, money, or seeking a visa to the US).

**A Cautionary Note on Gift-Giving**

In Senegal, phrases such as “ki dafa nay” (this person is tight-fisted) or “ki do maye” (this person is not generous) are frequently used to criticize the attitude of somebody who never thinks about sharing anything with others or giving part of what he has to others who have less or nothing. Giving is part and parcel of the culture, and the notion of ‘free gift’ is definitely a reality in Senegal (although modern life and glaring social inequalities tend to twist the initial intentions in such a traditional practice).

It is important to bring a gift for your host families as a symbol of your appreciation for staying in their home. These gifts don’t need to be elaborate but should demonstrate your appreciation. Past students have told have that food products are always popular and appreciated by homestay families while calendars, local products from your state and T-shirts are appropriate for friends you make.

At the same time, gift giving to strangers on the street is viewed as condescending. You should exercise discretion about gift-giving in your family or agency in order to avoid hurt feelings because of perceived inequities. You do not, however, need to be embarrassed to accept a gift from somebody you know and trust, since it may simply be a token of friendship with no strings attached, and the giver normally should not expect anything in return. Likewise, if you decide to give, your gift will be accepted without the receiver thinking about returning the courtesy.

Even though giving in Senegal does not necessarily entail reciprocation, remember that you are coming from a part of the world which is considered the richest. This results in many false assumptions, including that the US student is naturally rich. Although this may not be true for all of you, you will realize in Senegal that you are better off than many of your Senegalese neighbors or friends. They will consequently assume when you go out together for a drink or a party that you have enough money to pay and treat everybody. In order to avoid this trap graciously, learn this phrase: “man jangkat la amuma xalis” (I am a student and I have no money.).

A few gifts given as tokens of friendship will certainly be very well received by the members of your host family: shirts, baseball caps, socks, pencils, pens, etc. They may raise expectations, and the next day some of the kids may be tempted to ask for more, but of course you will wear a nice smile and say: “jeex na” (there is no more left).

A gift will also be appreciated by your friend when you mean it to be a true illustration of your feelings for somebody with whom you have started forging bonds of genuine friendship.

Understand that by giving (without cleaning yourself out of the little you have and really need) you are not being necessarily condescending, so long as your action flows from the heart.

Be aware that the MSID program budget includes a small contribution to your agency, and you should speak with WARC about what that contribution should be. Assess the needs of the agency/community first, and try to help WARC use the contribution for something that you know can really be used. WARC usually gives an article of some kind rather than cash.

**Living in Dakar**

The French founded Dakar on the strategic Cape Verde peninsula in 1857. Construction of jetties and piers in various periods since then have gradually made Dakar into West Africa’s best harbor and naval base. When West Africa’s first railway connected it to Saint Louis in 1885, Dakar began to handle most of the imports and exports even from the Senegal River Valley, and Saint Louis rapidly deteriorated as a port.

Dakar’s real growth from village to metropolis began in 1904, when it displaced Saint Louis as capital of the still-new West Africa Federation. The opening in 1923 of the railroad to Bamako (capital of today’s Mali) on the Niger River further consolidated Dakar’s position as the major urban center of the region.

Like so many cities in the Global South, Dakar has grown quickly. It grew from 1,600 inhabitants in 1878 to 18,000 in 1904, 93,000 in 1936, and 800,000 in 1976. Today it exceeds two million, making it the third largest city in West Africa after Lagos (Nigeria) and Abidjan (Ivory Coast). It has acquired such status symbols as traffic jams and pollution.

Dakar remains a city of contrasts: businessmen and tourists, European clothes and traditional dress, colonial-style villas and modern skyscrapers, supermarkets and small shops, posh residential areas and shantytowns.

**Transportation**

Taxis and buses are the most common modes of transportation. The main method of travel around the country is by sept places, station wagons that carry seven passengers.
Communication

Email & Internet
You are not to use WARC computers for personal email or Internet surfing, but you can use their wireless access with your own laptop. Your other option is to use the Internet through services like Sonatel and Telecomplus or through cybercafes like Metissicana or Cyberworld. Cost is approximately $3 to $4 per hour of connect time. It can be difficult to get a computer at certain times of day, and equipment failure and power outages are frequent. Therefore, neither you nor your friends and family should count on being able to communicate consistently. MSID recommends that before going to Senegal you get an email address and give it to family and friends. You may use WARC’s Internet connections for academic work.

It is worth noting that broadband Internet in Senegal is much more limited than it is in the US. Senegal does not currently have the infrastructure to support high-speed networks that you may be used to back home.

Social Media
Not all countries share the same laws about freedom of expression that we have in the US. Keep in mind that derogatory comments, especially on social media, can result in legal claims and have extended legal implications even after you have returned to the United States.

Phones
Even if your Senegalese home has a telephone, you should not make international calls. Use a Telecentre or your cell phone. International calls from Senegal to the US are far more expensive than from the US to Senegal. If you do need to call, use a public phone at a “telecentre,” give your party in the US a number to call back, and then immediately hang up and wait for the return call at the lower US calling rate. Telecentres are available throughout Senegal.

You may be able to receive phone calls in your Senegalese home, but ask before giving your phone number to people back home. Remind any potential callers in the US that Senegal is six hours ahead of Minnesota during the winter and five when the US is on daylight saving time. You may wish to arrange a monthly time for your family to call once you have settled in and have a schedule and specific location.

Use the phone sparingly even for local calls, which in Senegal carry a toll. You may only have access to a telecentre during the internship if you are in a rural area.

The MSID Senegal program requires all students to purchase and carry cell phones while on the program. This is not only a good safety precaution, it also facilitates communication between students and program staff. MSID Senegal on-site program staff will assist students with selecting and obtaining cell phones and service contracts. The cost of the cell phones are included in the program’s budget estimate. The service contract or minutes that are purchased by students are not included in the budget estimate.

Local cell phones cost approximately $150, and phone chips are approximately $30. Students then purchase phone cards to make calls. This allows students to receive unlimited incoming calls, including from the US and to make local calls inexpensively. Students frequently sell their cell phone to the next incoming students or independently prior to departure.

Mail
Once you have received your homestay placement, mail can be sent to that address. After you go to your internship or research site you may be able to have mail sent to you in c/o your family or your agency; ask first, however. Otherwise, mail should be sent to the student address at WARC listed at the beginning of this handbook.

Mail typically takes about 10–20 days to reach Senegal from the US and 7–10 days from Senegal to the US. Send everything first class airmail. Letters posted to Dakar arrive much faster than letters sent to smaller towns. Valuable items should be sent through Fedex or DHL to WARC; obtain a receipt and airway bill number in case they get lost. Do not attempt to send a parcel or letter by surface mail; it will take at least three months.

Money Matters

Credit Cards
A credit card is a good resource for emergency situations and for obtaining cash advances, including cash for emergency situations, as long as you have a personal PIN. It is important to know your PIN in both letters and numbers. Please note that some ATMs require that the card have a metal “chip” visible on the front for added security. Many US credit cards now have this chip, but it is wise to ask your credit card company whether they can issue you a “chip credit card” if you do not yet have one.

Keep in mind that you may incur fees for using your credit card abroad. Be sure to notify your bank and credit card company that you will be traveling abroad for the semester/summer. If you do not, they may assume your foreign transactions are fraudulent and may deny further transactions.

The Plus, Cirrus, and other networks are available in Dakar; check with your bank or credit union to find out which network they use. Make sure that this isn’t your only source of money as there are times when the networks are down. It is also important to make sure your cards will not expire while you are on the program.
Financial Planning
Consult the program budget sheets on the MSID Senegal website for recommended spending amounts and plan to bring the appropriate amount. Refer to travel guides, such as Lonely Planet, for estimated daily expenses.

Your host family will provide two daily meals (breakfast and dinner) during the week and all three meals on the weekend. You will need to budget for your weekday lunches, bottled water, local transportation, and other miscellaneous expenses.

Personal spending habits vary too greatly to predict exactly how much it will cost you to live in your country during the program. Expenses tend to be higher in major cities than in most other locations. But wherever you are, the amount you spend will depend on your lifestyle and your own objectives in participating in MSID. The main variables are optional activities such as nights out, music or dance lessons, gifts, and especially recreational travel. You should budget accordingly.

In the past, many students have found that they spent much more money than they had anticipated. When asked what they spent it on, however, most have said travel.

A budget estimate can be found in the “Cost of Participation” on the Fees page: UMabroad.umn.edu/programs/africa/msid-senegal/fees.

Cost of Living
While the cost of living in Dakar is much lower than Minneapolis, it is still important for students to budget for their time abroad. A great tool to get clear understanding of the cost of living is http://expatistan.com. Expatistan provides up to the minute costs and comparisons of items in two different cities. We suggest that you take some time to compare both Dakar and Minneapolis-St. Paul or another American metropolitan area to see the differences for yourself.

Extracurricular Activities
It is important to consult with the on-site staff before undertaking activities in Dakar or traveling outside the city. The neighborhood where WARC is located is a safe residential area, but not all of Dakar is as safe. In addition, transportation outside of Dakar can be unreliable, and any travel should be discussed with the MSID staff.

Tips from Students
Past students have compiled the following list of additional information:

• Especially if you are female, expect to be asked constantly whether you are married or be proposed to by strangers. It is best just to ignore it.
• As a foreigner, you are likely to be perceived as rich. By Senegalese standards, you probably are, even if you think of yourself as a poor student. Be prepared to be asked for things, including help to get to the US or to obtain a US visa.
• The concept of Dutch treat does not exist in Senegal. If you invite someone to join you—even for your own birthday party—it will be assumed that you are paying.
• Avoid contact with street hustlers. Any response will likely set you up for an unforgettable experience.
• It is rude to turn down food or gifts when offered in your family (although not by vendors). If you do not want something, make a plausible excuse for not accepting it.
• People in Dakar are very well dressed. Pack nice clothing and leave behind excessive amounts of scrubby clothes.
• The Senegalese diet is very repetitive. Bring multi-vitamins.
• Wear conservative dress. Clothing that is too short or revealing will encourage unwanted attention.
• If you are having issues with your host family that can’t be resolved or make you uncomfortable, tell the on-site staff.
• Smartphones were helpful for keeping in contact with family when Wi-Fi was available. Be sure to check settings so you aren’t using data international. Don’t be flashy with smartphone use because it can make you a target for theft.
Social & Cultural Adjustments

Student Identity

As a foreigner in Senegal, you will need to take the initiative to meet people. Don’t be afraid to start a conversation with others.

Race & Ethnicity

You may wish to consult the resources available at the University of Minnesota Learning Abroad Center (LAC) related to students of color and learning abroad. For more information, visit: UMabroad.umn.edu/students/identity.

Race can influence students’ perspectives on their host country. Past participants of color tell us that the differences between their experiences and those of Euro-Americans can include both advantages and disadvantages. Students of color often learn a great deal about their identity as a US citizen through an experience in a foreign country, and they sometimes find the new cultural context quite liberating. On the other hand, they occasionally encounter new forms of prejudice and discrimination. It is important that participants of all races avoid projecting American assumptions and attitudes about race onto the host culture. For example, definitions of racial categories, if they exist at all, may be very different from those in the US.

It is difficult to generalize about the overt and covert levels of racism that may or may not exist in any given culture, or to predict what a particular student’s personal experience will be. It can be said that any experience abroad will be a combination of circumstances, attitude, and coping skills. Some study abroad offices have put together resources for students of color who are preparing to study abroad. You should contact your own study abroad office or a member of the LAC MSID staff for additional information.

Students, especially those of non-West African heritage, might find that locals refer them to as “toubab”. While the original meaning of this word was “white,” it is now used more so to refer to anyone that is a foreigner.

Gender

It is important to remember that the concept of “No means no” and what is considered consent are very much Western and, more specifically, American concepts that don’t exist in Senegal.

Gender roles tend to be more rigidly defined in Senegal, especially in rural areas, than they are today in the US. You may find that people respond quite differently to you depending on whether you are male or female. You may also observe a strongly gender-based division of labor in your homestay family or your agency. This sometimes challenges students’ cross-cultural understanding and skills. As in other areas, try to understand what is going on rather than to judge. It is all right to gently test the limits of gender roles—for example, if you are male to see what happens when you offer a couple of times to help with the dishes in your homestay, or if you are female to try to be more assertive than you observe among female colleagues in your agency—and be sensitive to the feedback you receive. Above all, resist any temptation to launch a one-person crusade to change things. For example, even if you feel that your homestay mother and sisters are “oppressed,” you will not be able to “liberate” them, and any attempt to do so could irreparably harm your relations with your family.

Many women experience “cat calls” and other forms of gender harassment while overseas. Be prepared in advance for this possibility and consider the following coping strategies: look straight ahead and keep walking; walk with a purpose and do not appear to be wandering without aim, walk quickly and with confidence; say “no” or “no, thank you” with conviction; consider wearing local attire to help you blend in (shawls, head scarves, etc. can reduce the possibility of intruders catching your eye and attention); develop a tough skin and do not take the matter personally; avoid walking alone or at night.

Cultural norms concerning relations between men and women, including dating, vary considerably among developing countries, and even from one region to another or between rural and urban settings. This topic will be included in your in-country orientation. When in doubt concerning what behavior is acceptable, consult with a trusted MSID staff or faculty member.

Sexual Orientation

Attitudes toward sexuality vary greatly from country to country. Some cultures are open about homosexuality, and strong gay communities exist in many cities. However, some cultures and peoples are intolerant of different sexual preferences, and strict taboos or laws against such relationships may exist. As a result, it is important to disclose to the program staff either through the program housing form or by contacting the LAC program staff directly for guidance. For more information, visit: UMabroad.umn.edu/students/identity.

Attitudes toward sexuality in Senegal are very traditional. People are generally intolerant of different sexual preferences, and strict taboos and laws against such relationships exist. We encourage you to find out how different sexual preferences are viewed overseas and where your support may exist, so that your time overseas can be as enriching as possible. Consult with the Learning Abroad Center staff for more information on gay, lesbian, bisexual, and transgender issues if you have any questions.
As a general background, it is important to know that Senegal criminalizes homosexuality and that an overwhelming majority of the Senegalese population doesn’t accept it.

**Disabilities**

Many of the disability accommodations or services that are provided at US universities may be different or unavailable overseas. Being in a new environment can also be stressful, and accommodations that you may not have needed at home may become necessary in an unfamiliar setting. Participants with any kind of disability, whether hidden or visible, should contact the LAC in advance to discuss their particular needs. For more information, visit: [UMabroad.umn.edu/students/identity](http://www.umn.edu/students/identity).

In general, Senegal can be very difficult for people with physical disabilities. There are many high curbs, uneven sidewalks, hectic traffic, pedestrian walkways that are only accessible by steps, and public transportation that is not accessible. Students should be prepared for the fact that disability will be culturally defined. With this mind, we still encourage students to reach out to Learning Abroad Center staff with any disability/access questions and encourage students to utilize resources like Mobility International USA as well: [http://www.miusa.org](http://www.miusa.org).

MSID in-country staff are more than willing to help locate personal assistance or arrange testing accommodations as needed, so long as they learn early enough of your needs. The level of physical accessibility varies from country to country. For example, wheelchair-accessible transportation or elevators may be non-existent in some parts of Senegal. On the other hand, local people tend to be very supportive and will often assist you in gaining access to public transportation or buildings. It is important to consider your comfort level in asking for access assistance while abroad.

**Diversity among Program Participants**

Whatever your own sexual orientation, gender, race, ethnicity, religious affiliation, or physical ability, keep in mind that you will be part of a diverse group. Some differences will be obvious or made known to you, others will not. Sensitivity to diversity within your own group will further enrich your experience abroad. Some of your most powerful learning experiences may revolve around differences within your group. MSID participants also come from extremely varied academic backgrounds. Majors range from the social sciences or humanities to fields such as engineering, business, or agriculture. An economics or political science student who has taken considerable coursework on development may find that some aspects of the academic coursework are repetitious; on the other hand, the field experiences in MSID offer a rich opportunity to explore the application of theory to practical settings. An engineering major may have little background in development or cross-cultural communication but may have practical skills and knowledge that make internship placements easier to find than for a liberal arts major. A student with limited course preparation relevant to MSID may bring a wealth of volunteer experience or social and political activism to the program. All students are strong in some dimensions and weak in others. Be prepared to share your strengths and to draw on those of your classmates.

**Heritage Students**

Students going to a location related to their ethnic heritage—for example, a black or African American student traveling to Senegal—might wish to examine critically their expectations in advance. If part of your reason for enrolling in MSID is to explore your own identity, be careful not to romanticize what you might find. Students often discover that local people perceive them much more in terms of their American identity than their racial or ethnic background. You may gain rich insights into your roots, but do not expect members of the host society to treat you as a returning brother or sister.

**Religious Identity**

While overwhelmingly most Senegalese are practicing Muslims, there is a Christian community in Senegal. The Senegalese are tolerant of different religions, but the concept of atheism or agnosticism isn’t one that is well known amongst Senegalese people.
Cultural Adjustment

The On-Site Experience

What happens when you suddenly lose clues and symbols that orient you to situations in everyday life? What happens when facial expressions, gestures, and words are unfamiliar? The psychological discomfort and adjustment period in a foreign country is commonly known as culture shock or cultural adjustment.

You will almost certainly experience some form of culture shock. It might hit you after two days, two weeks, or two months—timing varies widely for different people. Six common phases of cultural adjustment are listed below. These may be out of order for you, one phase may last longer than another, or you may skip a step entirely.

**Initial Fascination:** On arrival, your surroundings seem glamorous and exotic. You feel like the focus of attention and activity.

**Initial Culture Shock:** The initial fascination and euphoria fade as you settle in and you enter an emotional decline.

**Surface Adjustment:** After the initial “down” (a few days to a few weeks for most), you begin to truly adjust and settle into your surroundings. Language skills begin to improve, and you’ll feel less fatigued. Often you’ll be forming a small group of friends at this stage as well.

**Feelings of Isolation:** Difficulties in your new culture seem to stubbornly remain and you grow frustrated with the process. A sense of isolation sets in. Boredom and a lack of motivation often follow. Unresolved personal issues often surface during this stage.

**Integration/Acceptance:** After continued effort you find yourself more at ease with language, friends, and professional and academic interests. The culture you are living in is more easily examined. Differences between yourself and the society you live in become understandable and you come to accept both the situation and yourself in it, allowing you to relax and feel at home.

**Return Anxiety:** Just when you feel at home in the new country it’s time to go. Thoughts of leaving new friends raise anxiety similar to those felt before departure. You sense that you’ve changed as a person, and apprehension grows when you think about people at home who may not understand your new feelings and insights, yet you may feel guilty for wanting to stay.

When in any of the above phases, you may experience changes in sleeping habits, feelings of helplessness or hopelessness, loneliness, depression, unexplainable crying, placing blame for difficulties on the program or host culture, homesickness, getting angry easily, increase in physical ailments or pain, compulsive eating, or lack of appetite.

Other symptoms may manifest themselves as well. It is important to understand these are part of a normal process of adjustment; however, if uncomfortable feelings persist for extended periods or seem unbearable, seek assistance from your program’s on-site support staff.

---

**Cultural Adjustment Curve**

Adapted from Oberg (1950) and Gollahon (1963)
Looking Ahead

Career Information

Linking Undergraduate International Experience to Your Future Career

Learning abroad can help you develop and enhance intercultural competencies that are appealing to potential employers and graduate schools. Think about your academic and career goals before, during, and after your experience abroad. For more information, visit: UMabroad.umn.edu/students/career-info.

Re-Entry

Students often find that it is just as difficult, if not more difficult, to readjust to life in the US after studying abroad. You may find that your perspectives have changed significantly and that you may not connect with friends and family in the same way you did before going abroad. The LAC offers a variety of resources and opportunities to help you readjust to life in the US. For more information, visit: UMabroad.umn.edu/students/process/reentry.

In the particular case of MSID, the following tend to be among the biggest issues:

**Poverty and affluence**: MSID students catch many glimpses of the meaning of real poverty. You will gain a new perspective on resource use as you observe the austerity of most people’s lives in your host country. Everything is used until it is worn out, then re-used by someone else who is still poorer. Your host family may discourage you from showering more than a minute or two per day in order to conserve water, or from reading late at night because of the energy that a light bulb consumes. Then, when you return home, you may experience a profound sense of resentment at over-consumption and waste in the US. People in the US may seem to have far too much, and their dissatisfaction about still not having enough may seem incomprehensible.

**US influence**: Living in another country, especially a poorer one, affords many opportunities to observe the economic, political, and cultural roles the US and its corporations play on the global stage. Especially when viewed from the perspective of the poor in your host country, those roles may seem less than constructive. Upon return to the US, you may feel resentful that such issues trouble your friends and family members so much less than you think they should.

**Ignorance and distortion**: You may find yourself intensely resentful of the US media. Coverage of the rest of the world, when it exists at all, may seem shallow and ethnocentric, and the depths of American ignorance may appall you. Remember, though, that you were probably almost equally ignorant of your future host country a year ago.

**Social justice**: The inequalities of your host society probably hit you daily throughout your MSID experience. Upon return you will likely be more attuned to see the inequalities in our own society. You will find yourself asking why so rich a country should have the most inequitable distribution of income and wealth anywhere in the industrialized world, and you may find it strange that others here can be so oblivious to injustice.

**Values and pace**: The MSID experience leads many students to reexamine their own values and lifestyle. Although the slow pace of life in your host society may have been frustrating initially, you finally did learn how to just “be,” rather than always needing to “do.” Now the hectic pace of US life may well feel disconcerting, even offensive. US society may seem obsessed with productivity, leaving little time for cultivating the human relationships you have found central to your host culture. director and the program coordinator maintain frequent email communication with the MSID staff in Minnesota.

MSID is likely to prove to be one of the most profound learning experiences of your life. It will not always be easy, but if you are willing to invest the requisite amounts of emotional and intellectual energy, you will be forever changed. MSID staff and faculty will do everything in their power to assist you in this adventure, but ultimately it is you who will make the experience what it is.

Appendix

Packing List

The following is a list developed by past MSID students and in-country staff. Adapt it to suit your own style and priorities. You will not need all the items on the packing list; they are only suggestions.

- 2 pair of comfortable shoes to walk long distances
- 1 pair of sandals
- 2 dress outfits
- Lots of underwear, durable bras
- Lightweight socks
- T-shirts
- Tank tops
- Skirts/dresses at knee-length or longer
- 3–4 pairs of pants (jeans, khakis, etc.)
- 1–2 long-sleeve lightweight shirts
- Several short-sleeve shirts
- 1 long-sleeve warm top
- Sweatpants (lightweight)
- Shorts (hiking/sport style) for beach and sports wear
- Bathing suit
- Bandanas or handkerchiefs
- Lightweight waterproof jacket
- Lightweight sweater
- Lightweight long-sleeve, long-leg pajamas
- Sun hat/cap
- Scarf and knit hat for chilly weather

**Household/Personal Items**
- Money belt containing passport, international immunization record, credit card, cash card, traveler’s checks, any dollars you are taking in cash, etc.
- 1 or 2 towels and washcloths
- Travel-size umbrella
- Travel alarm
- Digital camera with extra batteries (recharging is only possible with a voltage converter)
- Film or digital flashcards (most film/batteries/developing are available in country)
- Ziplock plastic baggies
- Flashlight
- 1 or 2 water bottles
- Sewing kit, safety pins
- Wristwatch
- Music player
- Electric converter and adapter if you are taking electrical items *Please be aware, electricity is very expensive and host families may want to limit the use of electric appliances
- Contact information of friends/family/academic contacts
- Guide book (e.g., Lonely Planet or Rough Guide)
- Pocket knife
- Photographs of friends and family, your house, your community, etc.
- Locks for luggage
- Zip/flash drive

**Health Items & Toiletries**
- A full supply of prescription drugs in original bottles (in case customs needs documentation); include one prescription for bacterial dysentery and directions for its use
- First-aid kit
- Insect repellent (at least 21% DEET)
- Anti-itch gel for mosquito bites
- Condoms, birth control
- Tampons (expensive or unavailable in country)
- Bladder infection medication, yeast infection medication
- Anti-diarrheal medicine
- Pepto-Bismol or similar stomach settler
- Laxatives
- Small packages of tissue or toilet paper
- Pain medicines
- Sunscreen (high SPF)
- Aloe vera gel for sunburns
- Sunglasses
- Lip balm with sunscreen
- Vitamins
- Hand sanitizer
- Eye drops
- Ear plugs
- All contact lens materials needed for your stay
- An extra pair of glasses and a copy of your prescription
- Sanitary moist wipes
- Toiletries: soap, deodorant, shampoo, and toothpaste are all easily available in country (but take enough for first few weeks); dental floss (take enough for your stay), nail clippers, toothbrush, hairbrush or comb, razor
- Thermometer to detect a fever. In hot climates, it is very difficult to assess a fever independently.
- Granola bars
- Water filter/purifier, iodine tablets
MSID Habits

MSID seeks to foster in its participants nine lifelong habits of mind, heart, and action. The program has been deliberately designed to help its participants acquire these habits.

Habit 1: Think, Feel, & Act Holistically
MSID helps students value many kinds of knowledge and ways of knowing. It asks them to cultivate not only the cognitive domain but also the affective and behavioral and to appreciate not only western linear approaches but also more holistic non-western approaches.

Habit 2: Extract Meaning from Experience
After leaving the university, most people receive information not through neatly organized lectures or textbooks but through real-world events. MSID’s experiential pedagogy provides opportunities to hone important observational and analytical skills. Field experiences and writing assignments push students to move continually back and forth between experience and ideas. MSID challenges students to apply theories, concepts, and modes of analysis to help understand their experiences but also to critique these same theories, concepts, and tools in light of those experiences. MSID strives to produce alumni who are actively attentive to their surroundings, who have learned to spot the significant in the midst of the mundane, and who seek to produce ongoing dialogue between theory and practice.

Habit 3: Understand the Intimate Relationship between Knowledge & Power
As MSID students seek to understand how poverty, discrimination, and powerlessness are produced and manipulated, and as they dissect “knowledge” about development, they come to see more clearly that knowledge is socially constructed. MSID alumni should reflexively ask who has produced particular knowledge, on what perceptions of reality that knowledge is built, whose interests it serves, and how knowledge based on other realities and interests might differ. They will be aware that the public arena reflects some realities better than others. MSID is intentionally cross-class as well as cross-cultural. MSID alumni should constantly reflect on what voices are absent or distorted in public discourse and in media portrayals. They should wonder how civic dialogue would change if valuing a diversity of voices and opinions were the norm rather than the exception. They should seek to hear those multiple voices themselves and to help them reach the ears of others.

Habit 4: Savor Diversity
Working in boundary zones generates creativity. Through classroom study, homestays, internships, excursions, and field assignments, MSID brings students into interfaces across boundaries of culture, social class, religion, and ideological perspective. Program alumni should be eager to move beyond their comfort zones and resist the temptation to surround themselves only with people like themselves. Knowing that reality is too complex to yield to the tools and insights of a single academic tradition, they should be addicted to interdisciplinary thinking and should seek always to understand a variety of perspectives before formulating their own positions.

Habit 5: Invoke the Global Context
The MSID experience pushes students to examine local and national issues in their host countries in the context of great forces—economic, political, social, environmental, cultural—that are reshaping the globe. Students often conclude that the dominant approaches are not working and that the world’s problems require a rethinking of development and intercultural relations at all levels. MSID alumni, by second nature, should consider the global context as they seek to understand and address issues in their own communities. In the quest for alternatives, they should be capable of questioning the assumptions that underlie current ways of doing things, and of thinking creatively about alternatives. Moreover, having come to a new appreciation for the perspectives and strengths of at least one society within the Global South, they should have an ongoing impulse to help others share that appreciation. In ways big or small, they should find themselves striving to build north-south bridges.
Habit 6: Take a Long-Term Perspective

Political systems and the marketplace give disproportional weight to the short term (e.g., the latest poll results or quarterly financial reports). MSID asks students to question models of “development” that are unsustainable and to challenge “progress” that is based on borrowing from those yet to come. MSID alumni should ask how decisions—individually and as a society—affect posterity. They should imagine what the voices of future generations would say if they could be heard and how to live keeping these voices in mind.

Habit 7: Cultivate Empathy

MSID helps students develop the capacity to experience aspects of reality from the frame of reference of others, to value their skills and insights, and to walk—at least mentally—in their shoes. An ability to identify with others casts suspicion on the asymmetry inherent in many efforts to promote development and social justice. MSID alumni should have not only a bent toward empathy but an aversion to condescension. When reflection and analysis lead them to couple empathy with action, they should instinctively eschew a vocabulary of “helping” in favor of “working with,” “joining the struggle of,” or “learning with.”

Habit 8: Foster Community

MSID students are immersed in societies less individualistic than their own. Their internships and homestays often prove a powerful venue for experiencing the magic of community. At the same time, they are part of a second kind of community—a community of learners. MSID students have a responsibility not only to maximize their own learning but to assist in the learning of their classmates. In the MSID model, all teachers are learners and all learners are teachers. The MSID experience should leave alumni with a respect for the power of community and a commitment to contributing effectively to the communities in which they participate.

Habit 9: Translate Insights & Values into Action

By immersing themselves in alternative realities, MSID students gain new insights into their own. By learning about the other, they rethink who they are. By directly participating in work within the host country, they act on their learning. Through writing assignments and group discussions, they continually reflect on their own relationship to issues of injustice and social change. As they gain new self-understanding, they reexamine what is important to them and what kind of lives they wish to live—as professionals, as consumers, as investors, as parents, as citizens. This reexamination should be not a one-time event but a lifelong process. MSID alumni should lead lives of effective action coupled with critical reflection. They should have a lifelong passion for justice and a lifelong habit of thoughtful civic engagement.
INDEPENDENT TRAVEL FORM

This form must be completed for all independent travel as indicated by the release and waiver you signed prior to participation (https://gps.umn.edu/registration/release/245). Failure to complete in full and submit prior to departure will be grounds for review and sanctions as outlined in the Policy on Student Conduct in Education Abroad Opportunities (UMabroad.umn.edu/assets/files/PDFs/policies/rightsResponsibilities/studentConduct.pdf).

Note:
1. Students are not allowed to travel to a country under a US State Department Travel Warning or one not recognized by the US government (e.g., North Korea) without prior approval. A copy of the suspension committee approval is required with this form.
2. Independent travel should not interfere with academic work, classes, or events. On-site staff has the authority to deny travel due to such conflicts.
3. Failure to return on time may be subject to dismissal. Travel with your program contact details and keep the staff updated on any changes to your plans.

Complete one form per student, per trip.
